Hainan Dongchong Investment Co., Ltd.

EMPOWER ENTERPRISE GROWTH IN HAINAN FREE TRADE PORT

Professional Capital · Consulting · Intellectual Property · Technology Services

LOCATION: JIYANG DISTRICT, SANYA CITY ESTABLISHED: MAY 2026

ABOUT US

Hainan Dongchong Investment Co., Ltd. is located in Jiyang District, Sanya City, the vibrant core zone of the Hainan Free Trade Port. Founded in May 2026, the company is strategically positioned to capture the unique policy dividends, geographic strengths and opening-up opportunities of Hainan, building a diversified service ecosystem centered on capital operation, professional consulting, intellectual property, technology transformation and the R&D and supply of high-quality pet products.

Rooted in Sanya and radiating across the whole Hainan Free Trade Port and overseas markets, we take compliance as the bottom line of all business operations. We gather a team of cross-industry experienced professionals and rich industrial resources. We integrate capital deployment, customized consulting solutions, full-cycle intellectual property management, technology achievement incubation and smart pet product development, to deliver one-stop supporting services for enterprises of different development stages.

We adhere to the service tenet of integrity, professionalism and win-win cooperation. We keep helping market entities resolve operational challenges, seize development dividends brought by the free trade port, and achieve stable and high-quality growth.

Core Business

- Premium Smart Pet Supplies

1. We specialize in the R&D and supply of premium smart pet products, with a primary focus on cat care solutions that blend smart technology, safety and practicality. Our product lineup covers smart pet feeders, smart water fountains, self-cleaning cat litter boxes, pet drying boxes, interactive cat toys, and a full range of supporting cat supplies.
2. Our smart feeder series enables scheduled feeding, precise portion control and remote management, locking in food freshness and helping pet owners build stable, scientific feeding routines for their cats. The smart water fountain adopts circulating filtration design to provide clean, flowing fresh water, encouraging adequate hydration and safeguarding urinary health for felines. The self-cleaning cat litter box automatically disposes waste and controls odors, greatly reducing daily cleaning work while built-in safety sensors protect cats during operation. The pet drying box delivers gentle, even airflow for safe and stress-free bathing drying. We also offer diverse interactive cat toys to stimulate cats’ natural hunting instincts, boost activity and relieve anxiety for indoor pets.
3. We prioritize product safety, reliable quality and user-friendly experience. All products are engineered with pet-friendly, non-toxic materials and streamlined structures for easy disassembly and cleaning. We keep iterating our designs to fit modern household scenarios, bringing convenient, healthy and enjoyable care experience for cats and peace of mind for pet parents.

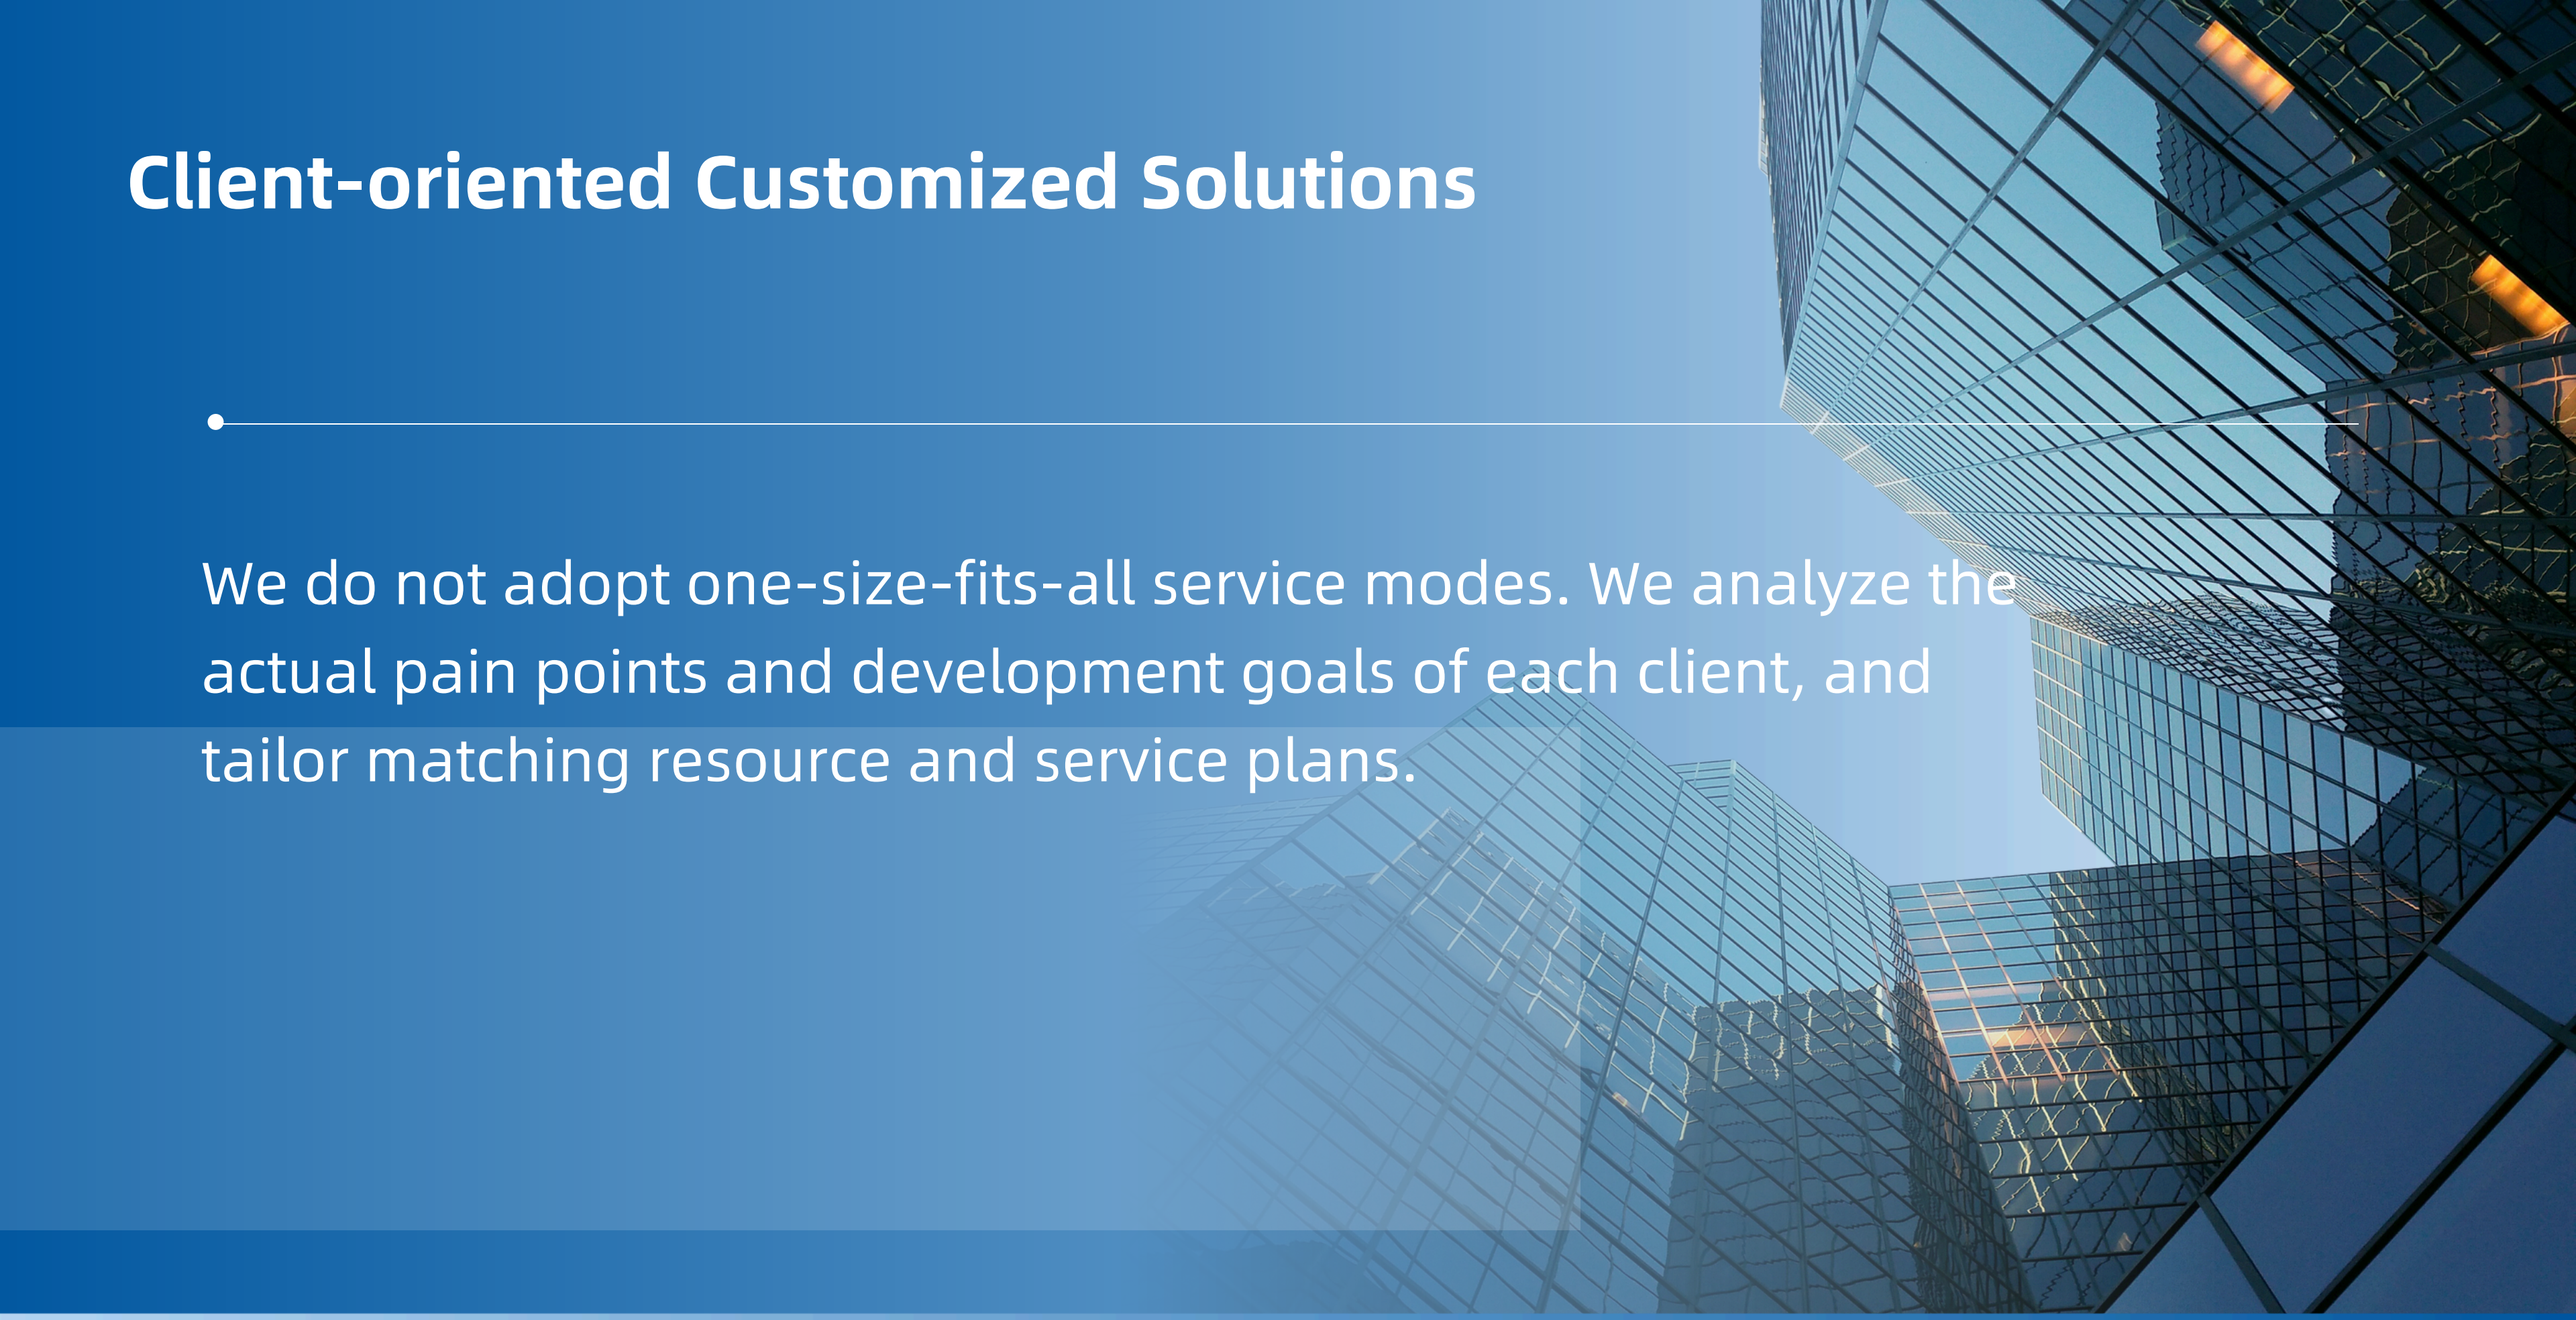
Our Philosophy & Vision

Compliance First

- All businesses are carried out in strict accordance with national and Hainan Free Trade Port regulations. Standardized processes and internal control systems are implemented to guarantee stable and safe operation.

Client-oriented Customized Solutions

We do not adopt one-size-fits-all service modes. We analyze the actual pain points and development goals of each client, and tailor matching resource and service plans.



Resource Integration & Synergy

We combine capital, consulting, IP, technology services and pet product supply organically, forming a closed-loop service system that can support enterprises from project incubation, financing layout, intellectual property protection, technology upgrading to product overseas sales.

Vision

Grow together with enterprises in the Hainan Free Trade Port. Become a reliable, comprehensive service partner that empowers innovative development of market players and delivers high-quality pet products to global pet families.
