B.M.T

A fusion of steel and elegance

COMPANY PROFILE

2026

Chinese steel, matched to your order.

Coil, plate, sections, rebar, pipe and tube — plus semi-finished products and prefabricated structures — from Chinese mills, exported to Africa, South-East Asia and South America since 2004.

Semi-finished products · Flat products · Long products · Structures – Pre-Fabrication · Tubes, Pipes, Casing · Special steels

Brilliance Mahk Import & Export (Shanghai) Co., Ltd.

INDEPENDENT STEEL TRADER · SHANGHAI FREE TRADE ZONE

D-U-N-S 544550468

WHO WE ARE

An independent steel trader in Shanghai

We have sourced and exported Chinese steel since 2004. We own no mill and no mill owns us — the specification decides the source.

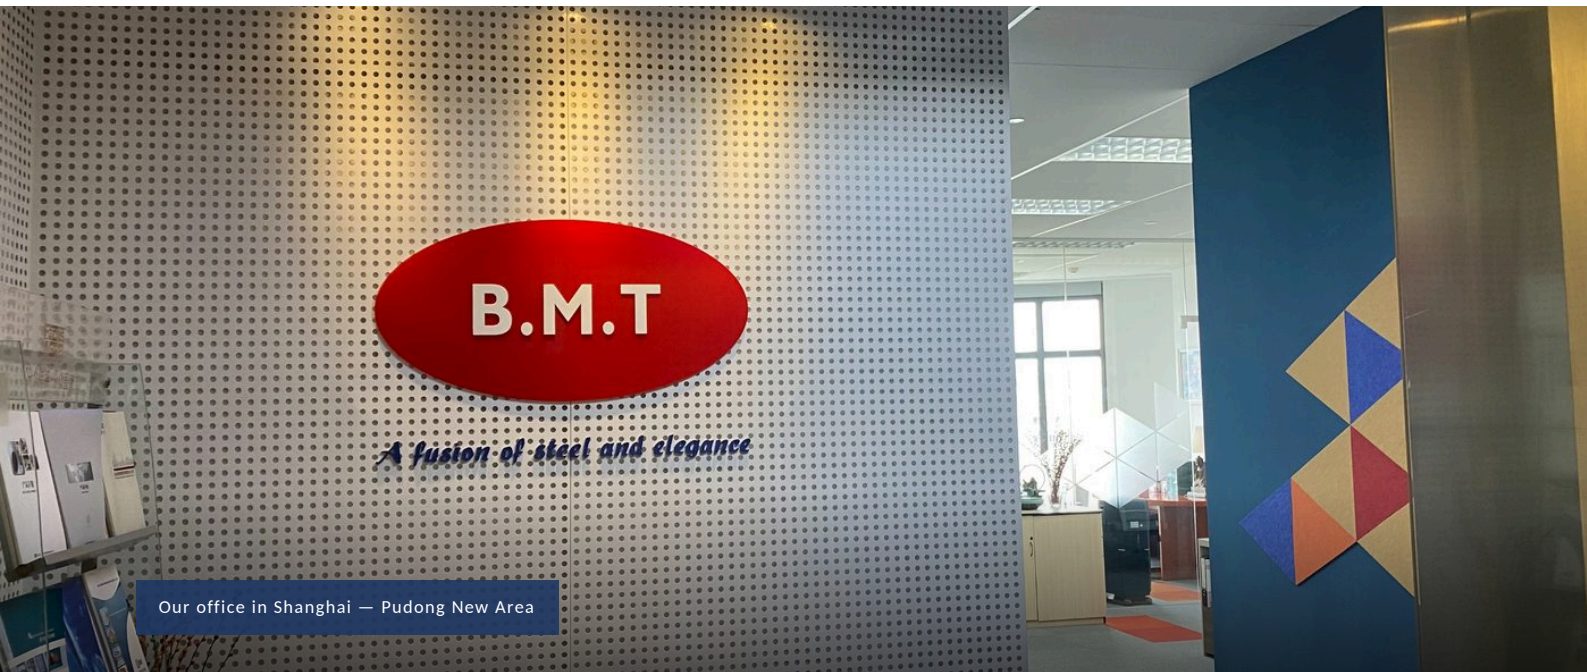

Brilliance Mahk Import & Export (Shanghai) Co., Ltd. is registered in the Shanghai Free Trade Zone with a full import and export licence. From Shanghai we supply importers, distributors, processors and EPC contractors in Africa, South-East Asia and South America.

Every enquiry is matched to the producer whose grade, tolerance, rolling schedule and price fit the requirement — and we say so when no mill can meet a specification. That independence is the working method, not a slogan.

One team stays with the order from the enquiry to the bill of lading: mill nomination, mill test certificates, third-party inspection, export documents and freight. Buyers deal with the person who quoted them.

Where an order needs it, trade financing is arranged with ICBC, international banks and Sinosure. A second line is in preparation: special steels from Europe that Chinese mills cannot yet produce.

FOUNDED	2004, Shanghai, China
HEAD OFFICE	Room 1008, Central Park Pudong, No. 538 Gushan Road, Pudong New Area, Shanghai 200135, China
REGISTRATION	Shanghai Free Trade Zone, full import and export licence
BUSINESS MODEL	Independent trader — no mill ownership, no group quota
MARKETS	Africa · South-East Asia · South America
D-U-N-S	544550468

Our office in Shanghai — Pudong New Area

PRODUCT RANGE

Six product groups, one point of contact

The range follows what our customers build, not what a single mill can roll. Every shipment leaves with mill test certificates; third-party inspection is arranged on request.

01

Semi-finished products

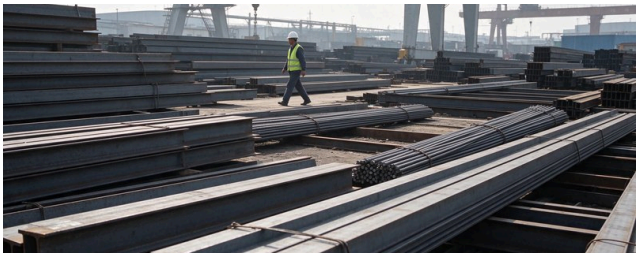

- Billets 3SP, 4SP, 5SP
- Slabs and blooms
- For rolling mills, rebar plants and forging shops

02

Flat products

- Hot and cold rolled coil and sheets
- Plates, galvanised and pre-painted coil (GI, PPGI, GL)
- Piling sheets

03

Long products

- Rebar and wire rod
- H-beams, I-beams, channels, angles
- Sections for construction and infrastructure

04

Tubes, Pipes, Casing

- Line pipe and oil well casing
- Seamless and ERW
- Flanges and fittings

05

Structures – Pre-Fabrication

- Public buildings, factories, multi-storey
- Bridge structures
- Energy and renewable energy frames

06

Special steels

- Abrasion and wear resistant steel
- Bearing and tool steel
- Sulphuric acid resistant plate

FROM ENQUIRY TO BILL OF LADING

One team, six steps, no handover

01

Enquiry

Product, grade, dimension, quantity and destination port — a drawing or a standard is enough to start.

02

Mill nomination

We compare producers on grade, tolerance, rolling schedule and price, and confirm what is realistic.

03

Order

Contract, payment terms and shipment window fixed against the mill's rolling schedule.

04

Production

Regular progress reports from the mill; changes are flagged before they become delays.

05

Inspection

Mill test certificates as standard; SGS, BV or TÜV inspection on request.

06

Shipment

Export documents, packing list, certificate of origin and bill of lading, checked before the vessel sails.

Quality and inspection

Mill test certificates with every shipment. Third-party inspection by SGS, BV or TÜV on request, arranged before loading — not after arrival.

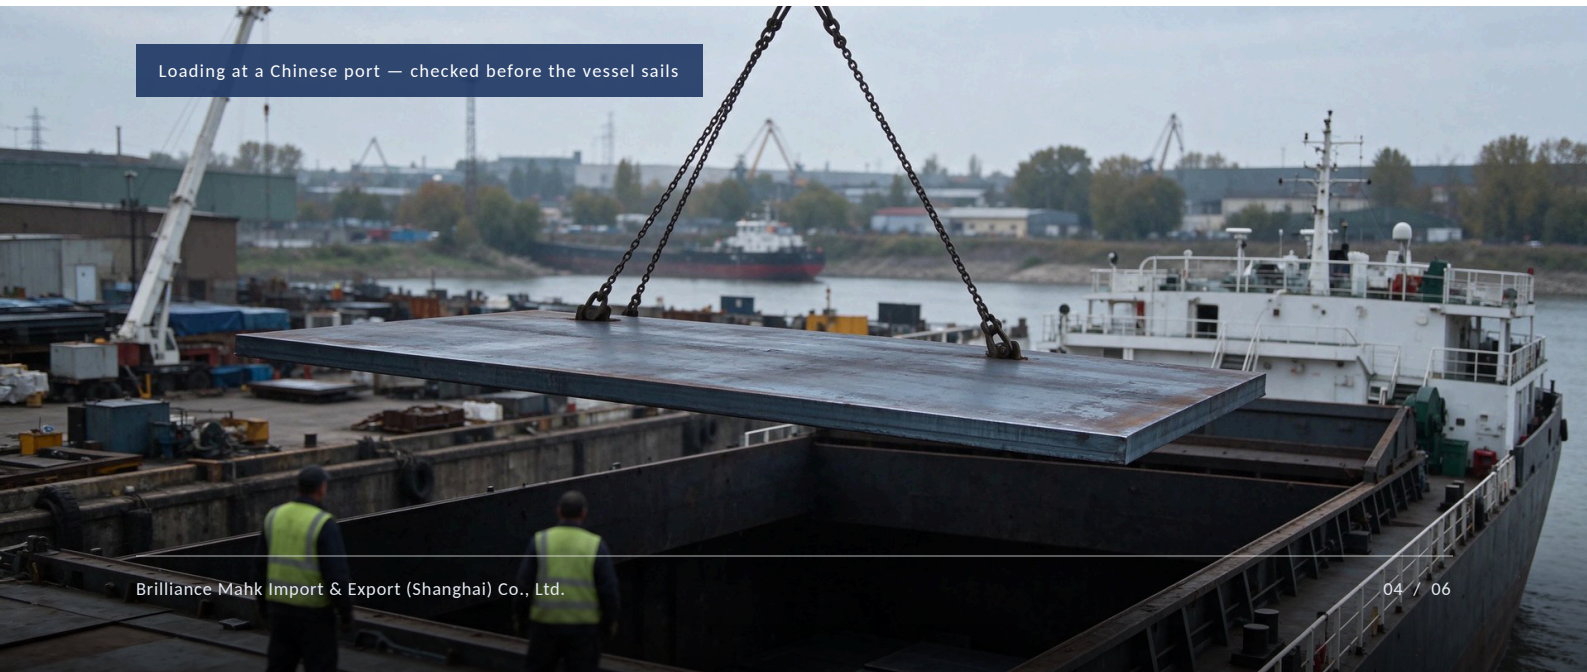

Trade financing

Flexible trade finance through ICBC, international banks and Sinosure where an order needs it. No project financing.

Logistics

Breakbulk, container or bulk from Chinese ports, matched to the product and the destination. Documents complete, first time.

> A realistic date is worth more than an optimistic one — if a mill is late or a grade is not available, you hear it from us first.

Loading at a Chinese port — checked before the vessel sails

WHERE WE SHIP, WHO WE SUPPLY

Markets we know, industries we supply

Markets

01 **Africa**

Importers, distributors and EPC contractors — our largest and longest-standing market.

02 **South-East Asia**

Processors, pipe mills and fabricators buying coil, plate and sections.

03 **South America**

Distributors and construction suppliers, shipped from North and East China.

04 **Europe**

Representative office in Düsseldorf for special steels and European enquiries.

Shipments from Shanghai, Tianjin, Qingdao and other Chinese ports, depending on the mill and the product.

Industries

EPC & Construction

Energy

Manufacturing

Steel Mills

Structural sections, rebar and plate for construction; line pipe and casing for energy; coil for pipe mills; billets, slabs and blooms for steel mills.

> The range follows what our customers build — not what a single mill can roll.

Africa · South-East Asia · South America

Shipped from Shanghai, Tianjin and Qingdao · Representative office in Düsseldorf, Germany
