

New upgrade 6.0

Customs data intelligent platform

Introduction to EX Customs Data

Customs import and export transaction information includes quantity, value, origin and destination, etc. Customs data is true, accurate, comprehensive, timely and detailed, and can be used for customer development and market analysis.

- 1 EX company introduction
- 2 Customs data query method
- 3 Precise email function
- 4 The value of customs data

EX company introduction

01

EX company introduction

EX company introduction

EX Data (www.data1688.com) was founded on November 11, 2006 in Hangzhou, the "economic capital". It is China's professional global trade data provider, close to Alibaba Group

Core competitive advantages

"Data + Technology + Service", big data analysis and global intelligent customer acquisition platform, mainly helps users analyze the market, develop customers, contact customers, and manage customers

Customs data query method

02

Customs data query method

Customs data source

Customs data comes from customs offices in various countries around the world

EX data platform

Covering 30 million real buyers in 200 countries around the world, and real-time updated import and export transaction data of more than 100 countries

The screenshot displays the EX DATA website's customs data query interface. The top navigation bar includes links for Home, Analysis Report, Customs Data (highlighted), Global Customer, Customer Contact, CRM, General Service, User Center, and System Management. The user is logged in as 'jshunew5'.

The search interface includes the following fields and options:

- Product DESC:** Input field with 'led | led light' and a 'Translate' button.
- HS code:** Input field with '940540'.
- Time:** Date range from 2023-03-11 to 2024-03-11.
- Time filter:** Radio buttons for 'This year', 'One year' (selected), 'Two years', and 'Three years'.
- Product Label:** Radio buttons for '太阳能' (selected) and 'All', with a 'Tag management >' link.
- Buyers:** Input field for the English name of the buyer.
- Supplier:** Input field for the Chinese/English name of the supplier.
- Purpose Country:** Input field for the destination country/region.
- Origin Country:** Input field for the origin country/region.
- Import & Export:** Dropdown menu set to 'All'.
- Filtration:** Checkboxes for 'Precise company', 'Remove logistics company' (checked), 'Remove joined CRM', 'With contact information', 'Exclude >', 'Accurate >', and 'Professional inquiries'.
- Buttons:** 'Reset' and 'Search'.

The search results summary shows: **190 Destination countries, 2683456 Transactions, 119014 buyers, 126938 Suppliers**. Below this are tabs for 'Datasheets', 'Market Trend', 'Country Analysis', 'Buyer Analysis', and 'Supplier Analysis'. A 'Clear History' button is also present.

The main table displays the following data:

Precise email function

03

Precise email function

Function introduction: AI search, covering the entire network contact information and background information

The screenshot displays the EX DATA Customer Contact interface. The top navigation bar includes Home, Analysis Report, Customs Data, Global Customer, Customer Contact (active), CRM, General Service, User Center, and System Management. The right side shows language settings (English), a Help icon, and the user name 'jishunew'. The left sidebar contains options for Contact, Contact information, AI retrieval, Collection Center, Manual search, Mass mailing, and Automatic marketing.

The main search area shows 'Company: walmart' and 'Website: www.walmart.com'. Search filters for 'Trade role' and 'Country / Region' are available. Below the search bar, there are tabs for 'Exact email', 'Mailbox Digging', 'Search Mail', 'LinkedIn search', and 'Background check'. A search results summary indicates 'Search results: Number of searches 3798'. Action buttons include 'Current page', 'Selected 0', 'Mass mailing', 'Add CRM', 'Favorite mailbox', and 'Export'. A 'Filter' dropdown is set to 'Please choose'.

- 8 - Clinic At Walmart - 美国 - 5065 Pyramid Way - Sparks - 89436-7703

The value of customs data

04

Analysis report

Commercial value

Customs data can provide important information about the import and export of goods and market trends, helping users develop customers, monitor peers/buyers, and analyze the market.

Actual case

Siemens

Through cooperation with EX Data, Siemens can quickly analyze customer situations from exhibitions, the Internet, B2B and other platforms, including import and export transaction details, upstream and downstream supply chain relationships, background information and customer contact information, etc. Through market analysis, we can also timely find high-profit buyers and high-quality large customers for development, seize the market as soon as possible, and seize business opportunities.
