公司简介

Company Profile

Guangdong Desifine Biotechnology Co., Ltd. was founded in 2000. The company is located in the Nansha Economic and Technological Development Zone in Guangzhou, which is at the center of the Greater Bay Area. It has a modern industrial plant covering a total area of 20 mu and an independent garden - style factory area with a beautiful environment.

The company's main business focuses on OEM/ODM processing services for a variety of cosmetics, including skin - care products, facial masks, hair and body care products, body anti - aging products, and private - part care products. It is a cosmetics brand customer service provider integrating product planning, formula research and development, large - scale production, and efficacy testing.

In 2016, the company invested 50 million RMB to introduce a batch of high - end, precise, and sophisticated production and testing equipment from countries with mature cosmetics industries such as France, Germany, and Switzerland. This equipped the workshop production lines into sophisticated, modern, scientific, and standardized production lines. Subsequently, the company obtained the "Cosmetics GMP Certification (GMPC Certification) from the US FDA (Food and Drug Administration)" and the "EU Cosmetics ISO22716 Quality Management System Standard Certification", and was rated as a "National High - tech Enterprise".

At the same time, it introduced the advanced management concepts and talent development systems of the German Henkel Group, comprehensively absorbed advanced German technologies, raw materials, and outstanding talents, and established an internal Standard Operating Procedure (SOP) management system, achieving internal standards that exceed industry standards in multiple sectors.

After years of accumulation and precipitation, Desifine not only has a mature and powerful scientific research team dedicated to the formula research and development and various testing and analysis of cosmetics. It also collaborates with experts and scholars from well - known universities such as Sun Yat - sen University, South China University of Technology, and Guangzhou University of Chinese Medicine to engage in the research and development of cosmetics.

The company has always adhered to the mission of "making humanity more beautiful with advanced biotechnology", and continuously promotes the development of the enterprise in various major sectors such as high - end research and development, authoritative testing, new - quality productivity, and personalized services.

发展历程

Company History

2000年

肇庆市清源坊化妆品有限公司成立

Zhaoqing Qingyuanfang Cosmetics Co., Ltd. was established.

2002年

肇庆市清秀日化有限公司成立

Zhaoqing Qingxiu Daily Chemical Co., Ltd. was established.

2005年

通过屈臣氏审核为“WATSONS”生产头发类产品

Pass the audit of Watsons and produce hair products for "Watsons".

2008年

通过沃尔玛核,为“伊维宝-EUOATE”生产护肤品

Pass the audit of Wal-Mart and produce skin care products for "Equate".

2006年

德国Rolf·Lentfer博士成为股东并担任技术总监

Dr. Rolf Lentfer from Germany has become a shareholder and is serving as the technical director.

2016年

更名“广东德丝肤生物科技有限公司”并搬迁至佛山南海通过欧盟标准的ISO22716质量体系认证通过美国FDA标准的GMPC质量体系认证

Change the name to "Guangdong Desifine Biotechnology Co., Ltd." and move to Nanhai, Foshan. Pass the ISO22716 quality system certification in line with EU standards and the GMPC quality system certification in line with US FDA standards.

2018年

获“国家高新技术企业”认证

Obtain the "National High-tech Enterprise" certification.

2019年

评选为佛山市“精华研发中心”“南海工程研究中心”获“中国化妆品绿色供应链优秀生产企业”

Be rated as the "Quintessence R&D Center" in Foshan and the "Nanhai Engineering Research Center", and awarded the title of "Outstanding Production Enterprise in China's Cosmetics Green Supply Chain".

2024年

搬迁至投资2亿的独立园区位于大湾区中心广州南沙经济开发区

Relocate to an independent park with an investment of 200 million yuan, which is located in Nansha Economic Development Zone, the center of the Guangdong-Hong Kong-Macao Greater Bay Area.

2022年

与华南理工大学、广州中医药大学等高校联合研发配方

Collaborate with universities including South China University of Technology and Guangzhou University of Chinese Medicine to jointly develop formulas.

- The founder of Desifine's basic formulas
- A doctor majoring in chemical analysis from the University of Hamburg in Germany
- Former Chief Engineer of the Chinese region of Henkel Group in Germany
- Former Technical Director and Production Director of three Henkel Group factories in China.

Rolf·Lentfer

德丝肤总工程师

Chief Engineer of Desifine

2006-至今

四大技术优势

Four technological advantages

活性原料

Active ingredients

Utilize the growth characteristics of cells and the biocatalytic system. React with organic substrates to obtain targeted active products in a directional manner, effectively preserving the active substances in plant raw materials.

透皮吸收

Transdermal absorption

The active ingredients are encapsulated in liposomes, which can perfectly integrate with the cell membrane, achieving the effect of penetrating the cell membrane, improving the absorption rate, and making the ingredients' effects last longer.

信号调控

Signal regulation

Open up the cells information pathways, receive accurate signal commands into the cell nucleus, stimulate the cell to produce endogenous substances, and extend the cell's lifespan.

精准靶向

Precision targeting

Utilize biopharmaceutical technologies. According to the needs of cells, precisely act on sub - healthy and aging points, and achieve continuous release.
