# MONALISHAMAGIC

## Awakening Natural Fibers with Interactive Technology

### Sustainable Innovation by Dongguan Yuexiong Textile

#### 01.

Where Nature Meets Magic At Yuexiong Textile, we believe the future of fashion lies in the fusion of Smart Technology and Sustainable Ecology. Through our core brand MONALISHMAGIC, we specialize in transforming classic natural fibers —organic cotton, wool, cashmere, and linen —into responsive, interactive textiles.

#### 02.

The "TechxNature" Revolution We are redefining functional yarns by grafting proprietary Photo-chromic (Light/UV Activated), Thermochromic, and Luminous systems onto eco-friendly materials. Leveraging our patented anhydrous (waterless) dyeing preparation process, we achieve vibrant, changing visuals without compromising the environmental integrity of the fiber.

#### 03.

Manufacturing Strength Established in 2016, our vertically integrated supply chain spans Jiangsu and Guangdong. From raw material R&D and Spinning (Worsted/Semi-worsted) to Dyeing and Finishing, our subsidiary Huizhou Aoxiong Flexible Technology guarantees the perfect balance between boutique innovation and stable, large-scale delivery.

The inspiration for "MONALISHAMAGIC" comes from the mysterious smile of Leonardo da Vinci's "Mona Lisa".

The divine beauty of the people in the painting is constantly changing from different angles and moods, and this interaction and emotional connection is precisely the magic we hope to endow every yarn with.

We combine the subtlety of art with the precision of technology, and after 10 years of research and development, we have created yarn that can transform freely in light, temperature, and environment. It is no longer a cold industrial product, but a "talking" and emotional expression carrier.

**WE NOT ONLY PRODUCE YARNS, BUT ALSO ARE DEVELOPING ADVANCED MATERIAL LANGUAGES.**

Relying on technological innovation, we have carried out in-depth technical upgrades for environmental protection and natural high-end yarns. We are committed to bridging the gap between 'creative design' and 'supply chain reality', ensuring excellent production efficiency while infusing each yarn with emotion and warmth.

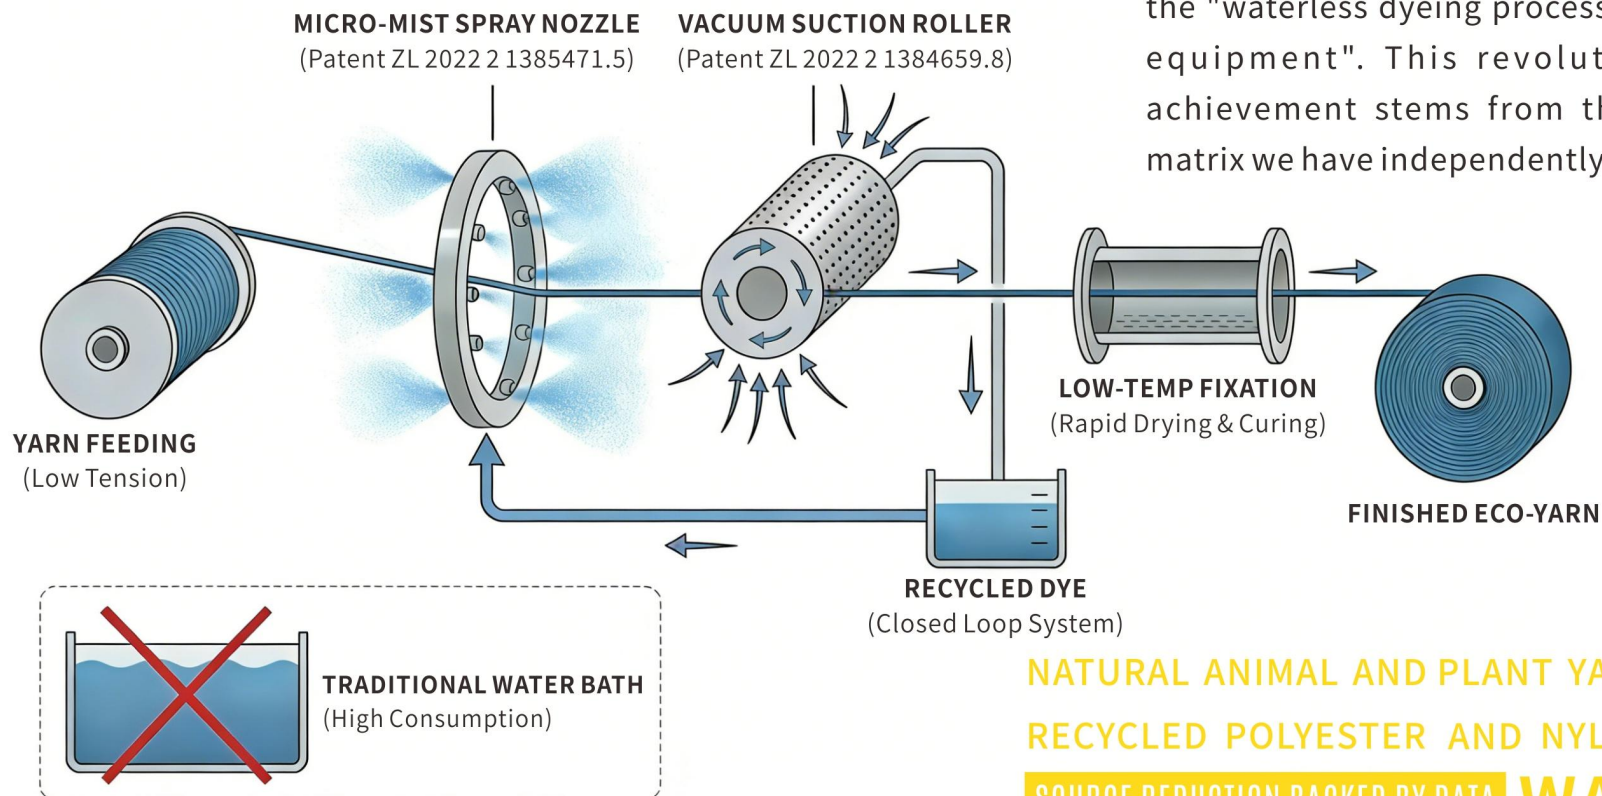

**Make the materials no longer remain silent, but become a medium for communication between humans and nature - make the yarn truly 'speak'.**

●●●●● **PART.02 Innovative Product**

# WATERLESS DYEING PROCESS

(invention Patent ZL 2023 1 1305729.5)

We reject the traditional end-of-pipe approach and instead achieve a complete elimination of waste at the production source through the dual breakthroughs of the "waterless dyeing process" and "innovation in core equipment". This revolutionary environmental achievement stems from the patented technology matrix we have independently developed.

**NATURAL ANIMAL AND PLANT YARN: 65% -70%**  
**RECYCLED POLYESTER AND NYLON: 90% -95%**  
**SOURCE REDUCTION BACKED BY DATA WATER SAVING**

# MONALISHAMAGIC (Visual Function)

Light  
(Photochromic)

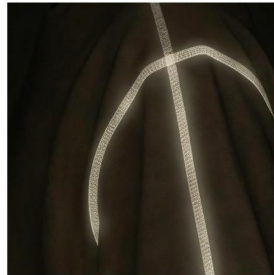

Appearance and retreat triggered by UV or strong light

Heat  
(Thermochromic)

A flow of color created by body heat and temperature differences

Night  
(Luminescent)

A subtle, soft glow in the dark

CANVAS Series  
(Linen & Paper)

The blooming effect of photochromism, like painting directly onto the material

AURORA Series  
(Wool & Cashmere)

Temperature flows within the fibers, making emotion visible

CHROMATIC  
PERFORMANCE Series  
(rPET/rNylon)

For outdoor, sport, commute, and accessories

**A MATERIAL WITH MULTIPLE FORMS OF PERCEPTION**

# Other specifications and qualities can be customized

## Sustainable Materials

Skin-friendly, durable and adaptable to diverse designs, our sustainable materials help brands fulfill environmental responsibilities and meet the market's demand for green consumption.

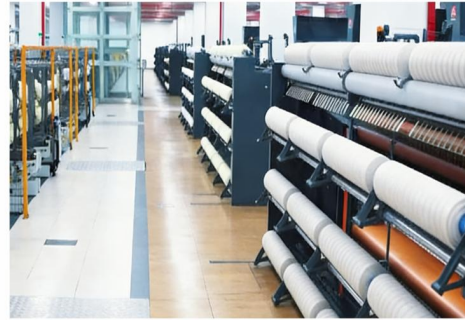

**THE CORNERSTONE OF INNOVATION**

### Our complete yarn system

From the iconic MONALISHAMAGIC to comprehensive basic and high-end raw materials

We provide solid and reliable material support for every idea.

●●●● PART.03 Corporate Showcase

## The four core advantages, Define high-quality yarn

### **Natural Health**

Selected natural and environmentally friendly raw materials, skin friendly, breathable and non irritating.

### **Multi Functional**

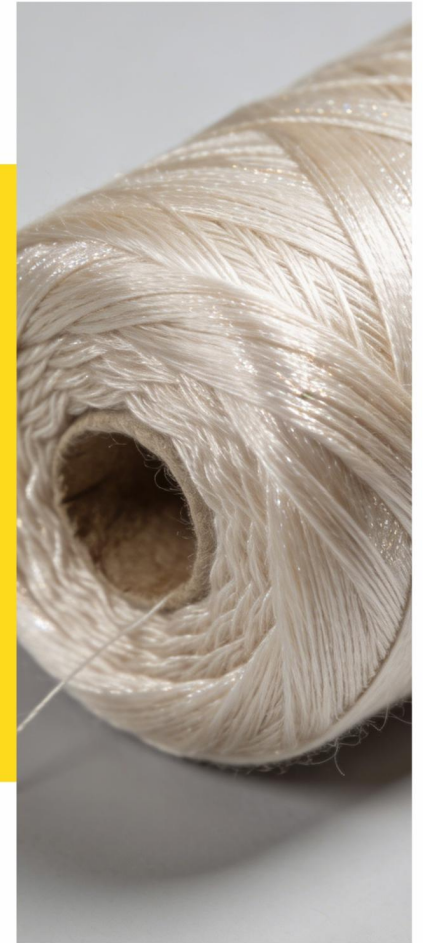

Multi functional category, covering all categories of seasonal outfits.

### **Premium Texture**

The unique texture and luster support the high-end clothing texture, meeting the requirements of designers.

### **Stable Shaping Effect**

Good stability, uniform dyeing, supporting knitting, weaving and other processes, easily realizing designer creativity.

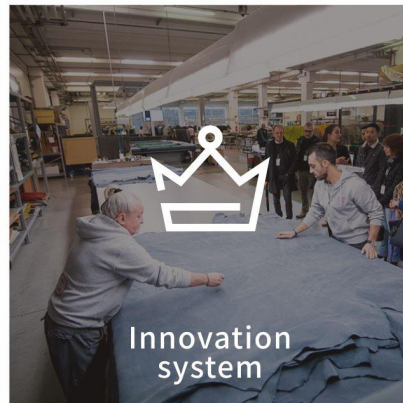

# PART.04 Certifications

●●●●● **PART.05 Production Services**

## **CORPORATE ADVANTAGES**

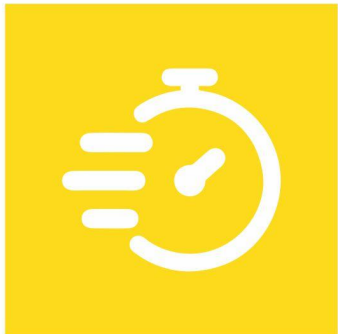

We select natural ingredients combined with biodegradable materials.

Relying on new environmentally friendly and low-energy processes to reduce pollution and carbon emissions.

The entire chain of independent innovation system for feeding, printing and dyeing.

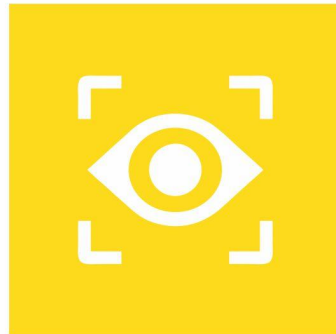

## COLLABORATION SERVICES

### Fast Sampling

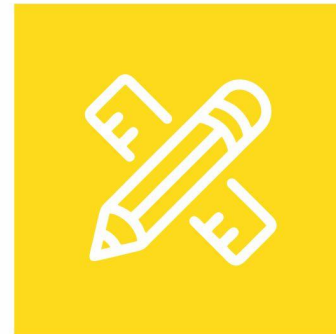

Efficient and precise sampling, shortening the R&D verification cycle

### color development

Stable craftsmanship, precise restoration of preset color effects

### Customized Specs

Customize parameters as needed, flexibly adapt to diverse needs

### Mass Production Support

Scale up production capacity, deliver on time with quality and quantity guaranteed

# WITH PATENTED TECHNOLOGY WEAVING GREEN TEXTILE NEW ECOLOGY

## SELF DEVELOPED PATENTED TECHNOLOGY DRIVES ENERGY-SAVING UPGRADES IN TEXTILE PRODUCTION

Independently developed patented waterless dyeing process, natural animal and plant yarns can save 65% -70% water, and recycled polyester and nylon yarns can save up to 90% -95% water, reducing pollution from the source and making them more environmentally friendly.

2 Utility Model Patents: Independently designed Yarn/Spinneret Protection Device reduces raw material and energy loss during production, lowering the energy consumption per meter of yarn.

## GLOBAL CERTIFICATION CONFIRMING GREEN STRENGTH

Origin-H2O is registered in the UAE, the US and Italy, and its green label unlocks global supply chains.

Compliant with FSC Forest Certification, ETKO (Organic/Recycled Cotton) and other standards, the whole process from raw materials to production meets low-carbon and sustainability requirements.

All tests have been passed, ensuring the quality and safety of the yarn while saving energy and reducing carbon emissions.

## NOT JUST ABOUT ENERGY CONSERVATION

Every yard of yarn reduces pollution and saves energy.

Every tech upgrade enables eco-friendly coexistence of textile industry and ecosystem.

MONALISHAMAGIC

Origin-H2O

# ONE STOP YARN SUPPLY PREFERRED PARTNER

We are a leading manufacturer in the field of yarn, specializing in induction based color changing and functional yarns. We have full chain independent capabilities from research and development design to large-scale production, stable and excellent product quality, and sufficient and convenient spot supply. We fully control the process and delivery, and provide customers with high-quality and customized yarn products.

1. Patents lead research and development, accurately matching needs
2. Precision production, fully controllable quality throughout the entire process
3. Capacity guarantee, efficient response to delivery
4. Authoritative certification and worry free quality assurance
5. Direct supply mode, sufficient inventory guarantee, efficient and convenient procurement

## FOR DESIGNERS

Fast sampling, clear logic for material behavior, and curated series (CANVAS.AURORA) for thematic collection development.

## FOR BRANDS

A supply-chain-ready system of specifications, with extensive customization options for our functional series.

## FOR FACTORIES & DEVELOPERS

Clear component data, count, and SKUs, with seamless transition from color development to bulk production.
