## Our Impact

# Trusted by Partners Around the World

Our commitment to quality and innovation has earned us the trust of businesses across industries. Here's what our track record looks like:

**12%**

### Customer Satisfaction

Consistent growth in satisfaction scores year over year

**15+**

### Customers Worldwide

Serving clients across domestic and international markets

**9+**

### Skilled Employees

A dedicated team of experienced coating specialists

**11+**

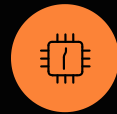

### Years of Experience

Over a decade of industrial expertise in surface treatment

# Superior Product Quality & Comprehensive Service

We have won widespread recognition and trust from numerous partners, and continue to receive support and cooperation from businesses in the industry – building a stable and healthy market cooperation ecosystem.

## Technology First

Years of accumulated technology and production experience give us significant advantages in processing complex structural components and high-standard appearance parts.

## People-Oriented

We adhere to a technology-driven and quality-oriented approach, committed to providing global customers with stable and efficient electrophoretic coating solutions.

## Honesty & Trustworthiness

The company has its own testing laboratory with multiple high-standard testing capabilities, including salt spray testing, ensuring reliability in every product.

Why Us

# Focused on the Electrophoretic Coating Field

In the future, Dongguan Yongxin Industrial Co., Ltd. will continue to focus on the electrophoretic coating field. We continuously optimize our processes and service systems to provide reliable surface treatment solutions for domestic and international customers with **higher standards and faster response times**.

Our goal is to help customers enhance the competitiveness of their products and achieve long-term win-win development.

## Process Optimization

Continuously refining coating processes for superior results

## Rapid Response

Faster turnaround times for domestic and international clients

## Win-Win Development

Long-term partnerships built on mutual growth and trust

# Our Production Capabilities

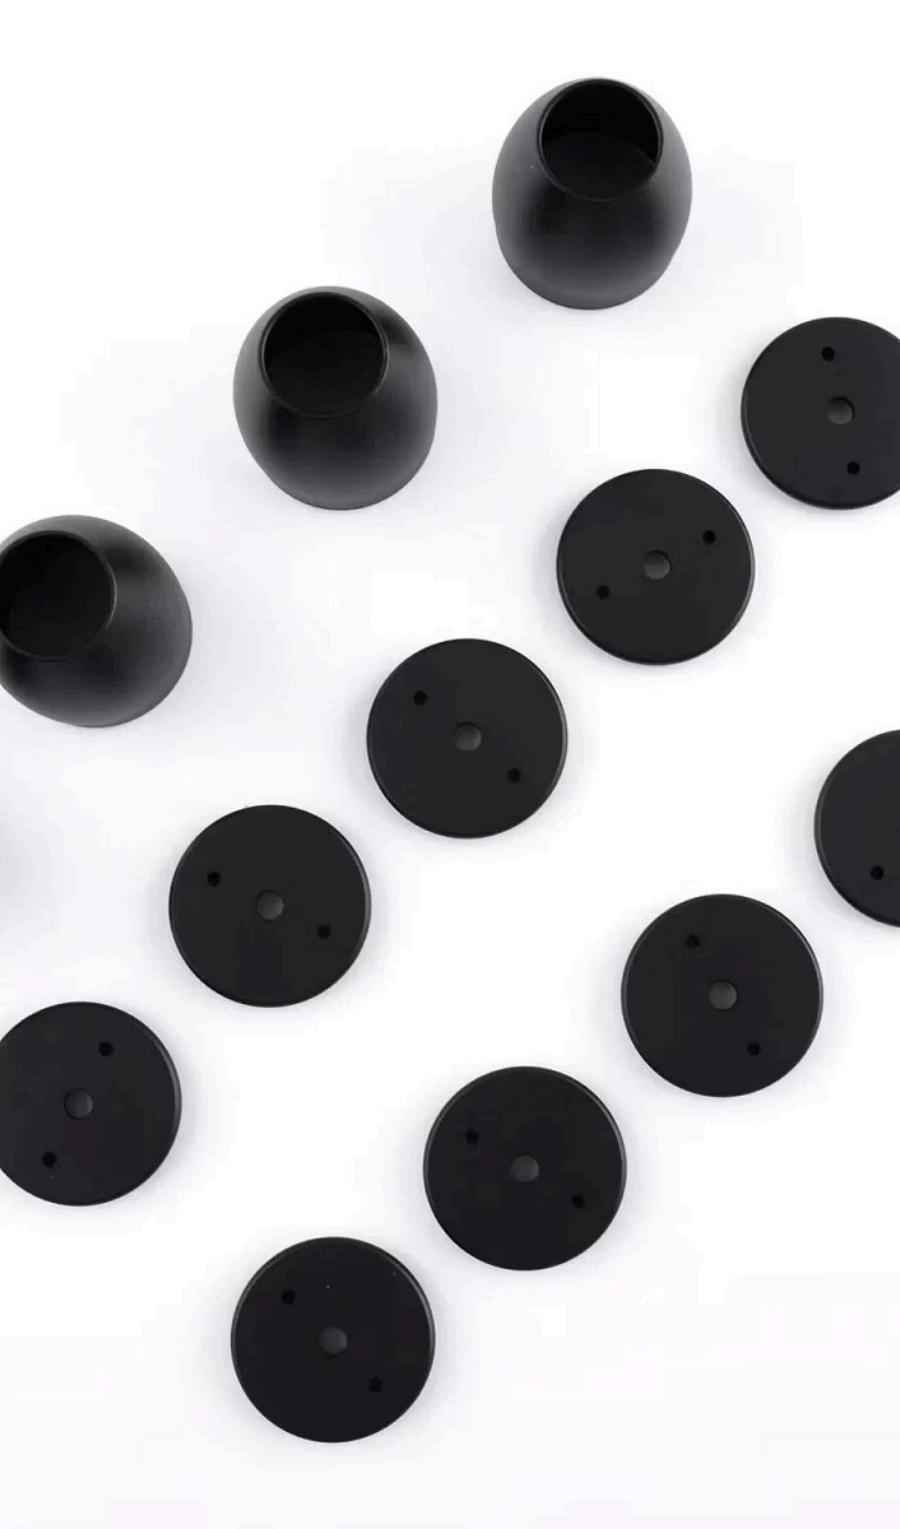

## 11+ Years of Industrial Experience

We consistently adhere to a technology-driven and quality-oriented approach, and are committed to providing stable and efficient electrophoretic coating solutions to global customers.

Our production floor is equipped with advanced coating lines and staffed by skilled technicians who ensure every component meets the highest quality standards before delivery.

- Advanced electrophoretic coating lines
- In-house quality testing laboratory
- Salt spray and corrosion resistance testing
- High adhesion surface treatment solutions
- Complex structural component processing

# Main Products: Black & White Electrophoresis

The company primarily serves the **small and precision hardware sector**, with products widely used across multiple industries. Leveraging years of accumulated expertise and production experience, we possess significant advantages in processing complex structural components and high-standard appearance parts.

## Bicycle Parts

Precision-coated components for the cycling industry, delivering durability and a flawless finish that withstands outdoor conditions.

## Cooling Fans

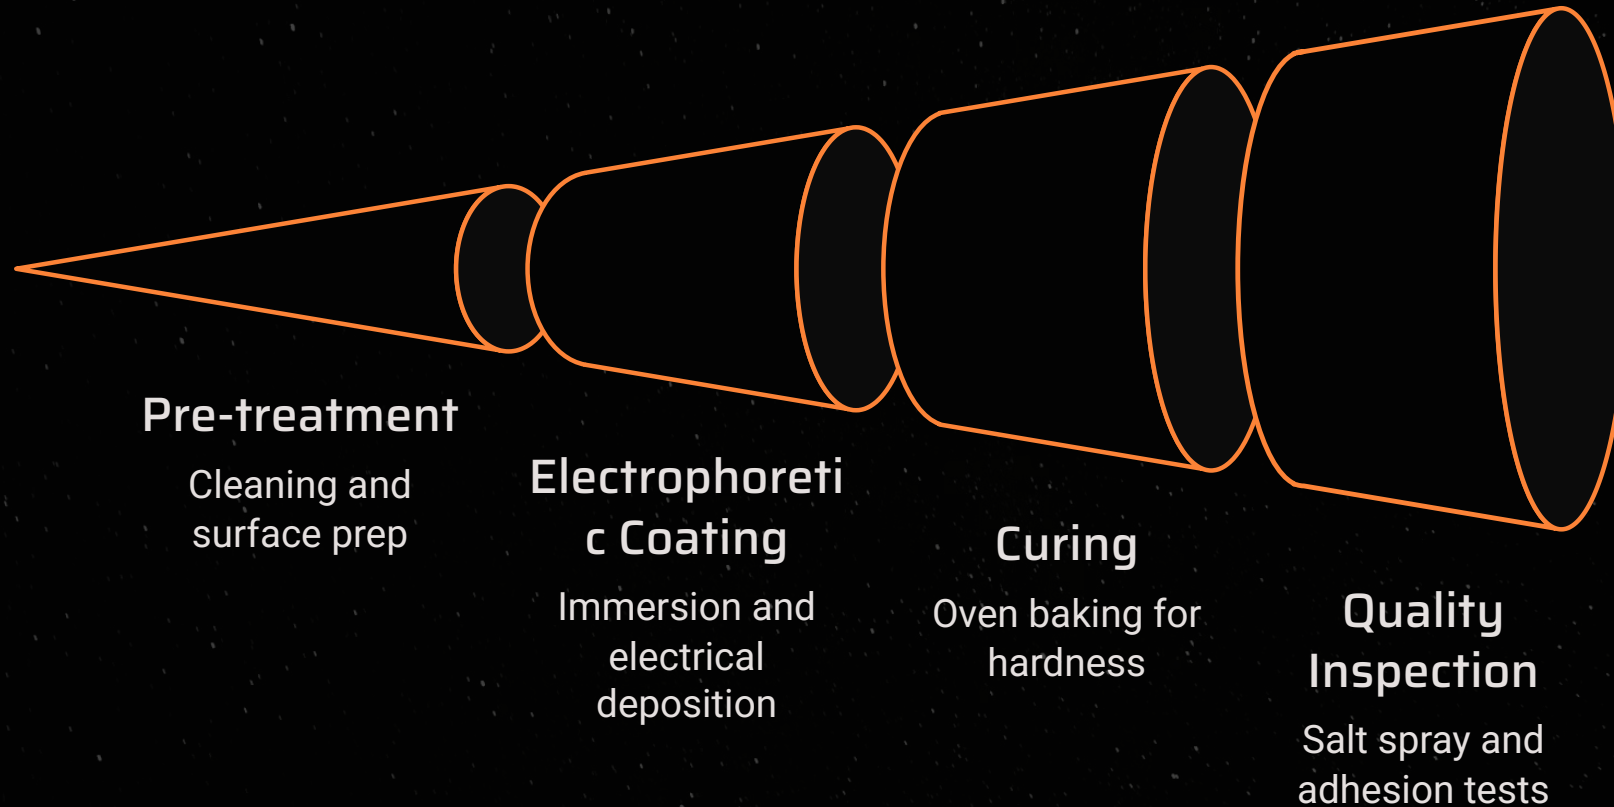

High-quality electrophoretic coatings applied to cooling fan components, ensuring heat resistance and long-lasting performance.

## Electronic Structural Components

Reliable surface treatment for electronic structural parts, providing excellent corrosion resistance and precise appearance standards.

# Our Coating Process

Our streamlined electrophoretic coating process ensures consistent quality at every stage – from initial surface preparation through final quality inspection – delivering products that meet the highest industry standards.

Our Partners

# Brands & Companies We Work With

Dongguan Yongxin Industrial Co., Ltd. has collaborated with renowned brands and companies, delivering exceptional products and solutions tailored to their unique requirements.

# What Our Clients Say

Recommendations from satisfied customers who love our products and services.

“ The company has its own testing laboratory with high-standard testing capabilities such as salt spray testing. It can provide surface treatment solutions with high corrosion resistance and high adhesion according to customer needs, ensuring that products still have excellent performance in harsh environments.

**Sean Edwards** – Acme Industries

“ With its superior product quality and comprehensive service guarantees, it has won widespread recognition and trust from numerous partners, and continues to gain support and cooperation from businesses in the industry, building a stable and healthy market cooperation ecosystem.

**Matthew Hills** – Kyrion Metallics

”

# Partner With Us for Reliable Surface Treatment Solutions

Dongguan Yongxin Industrial Co., Ltd. is committed to continuously optimizing our processes and service systems – providing domestic and international customers with **higher standards, faster response times, and long-term win-win development.**

## Advanced Technology

Cutting-edge electrophoretic coating processes backed by 11+ years of expertise

## Global Reach

Serving customers worldwide with reliable and efficient surface treatment solutions

## Quality Assured

In-house testing laboratory with salt spray and high-adhesion testing capabilities
