

TENMA
天馬國際株式会社

企業紹介 | Company Introduction

Tenma International Co., Ltd. is a global trade specialist that connects high-quality reuse resources from Japan to the world. From home appliances, furniture, and machine tools to daily household goods, we aggregate a wide range of products through our unique network and supply them in the optimal form to meet the demands of overseas markets.

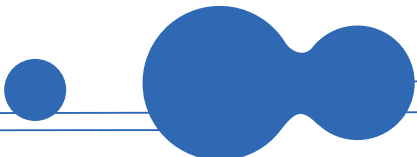

当社の強み | Our Strengths

- Clear reputation and quality control: carefully selected products that can be used repeatedly in overseas markets based on extensive experience criteria.
- Flexible purchasing and speedy response: Regardless of category, we have the agility to quickly detect potential market needs and immediately carry out purchasing and export.
- Global logistics network: We have established an efficient export system operating on a container-unit basis, delivering products safely and swiftly.

コーポレートスローガン | Corporate Slogan

「古きものに命を、世界に価値を。」
(Reviving the Past, Connecting the World with Value.)

事業のポジショニング | Business Positioning

"A bridge connecting Japan and the world for a circular society."
We are not merely an import/export trader. We discover new value in Japanese reuse products and establish ourselves as a "Value Connector" that promotes global resource circulation.

经营理念 | Management Philosophy

- The spirit of 'Sanpo Yoshi' (three-way satisfaction): We pursue a sustainable business model in which the seller, the buyer, and society (the environment) all benefit together.
- Fair and honest transactions: Based on transparent assessments and sincere communication, we build international relationships of trust.

創業の想い | Our Story

In Japan, there are countless 'treasures' lying dormant despite still being perfectly usable. We have witnessed time and again how these items, once shipped across the sea, go on to enrich someone's life abroad. We want to spread the Japanese spirit of 'mottainai' (regret over waste) to the world through practical, value-driven trade. Tenma International started from this single-minded aspiration.

サービス概要 | Service Overview

- Purchase of reusable items: Regardless of whether the seller is a corporation or an individual, we purchase a wide range of products—such as home appliances, furniture, tools, and general goods—at fair prices.
- Export support & consulting: From product selection based on local needs analysis to container loading and customs procedures, we provide comprehensive, end-to-end support.

取扱製品 | Products

The range of products we handle is extensive:

- Household appliances: Refrigerators, washing machines, dehumidifiers, gas stoves, printers, heaters, and more.**
- Home fixtures & furniture: Various furniture, interior items, tableware.
- Industrial & hobby: Power tools, audio equipment, hobby supplies.
