WELCOME MESSAGE

Who we are?

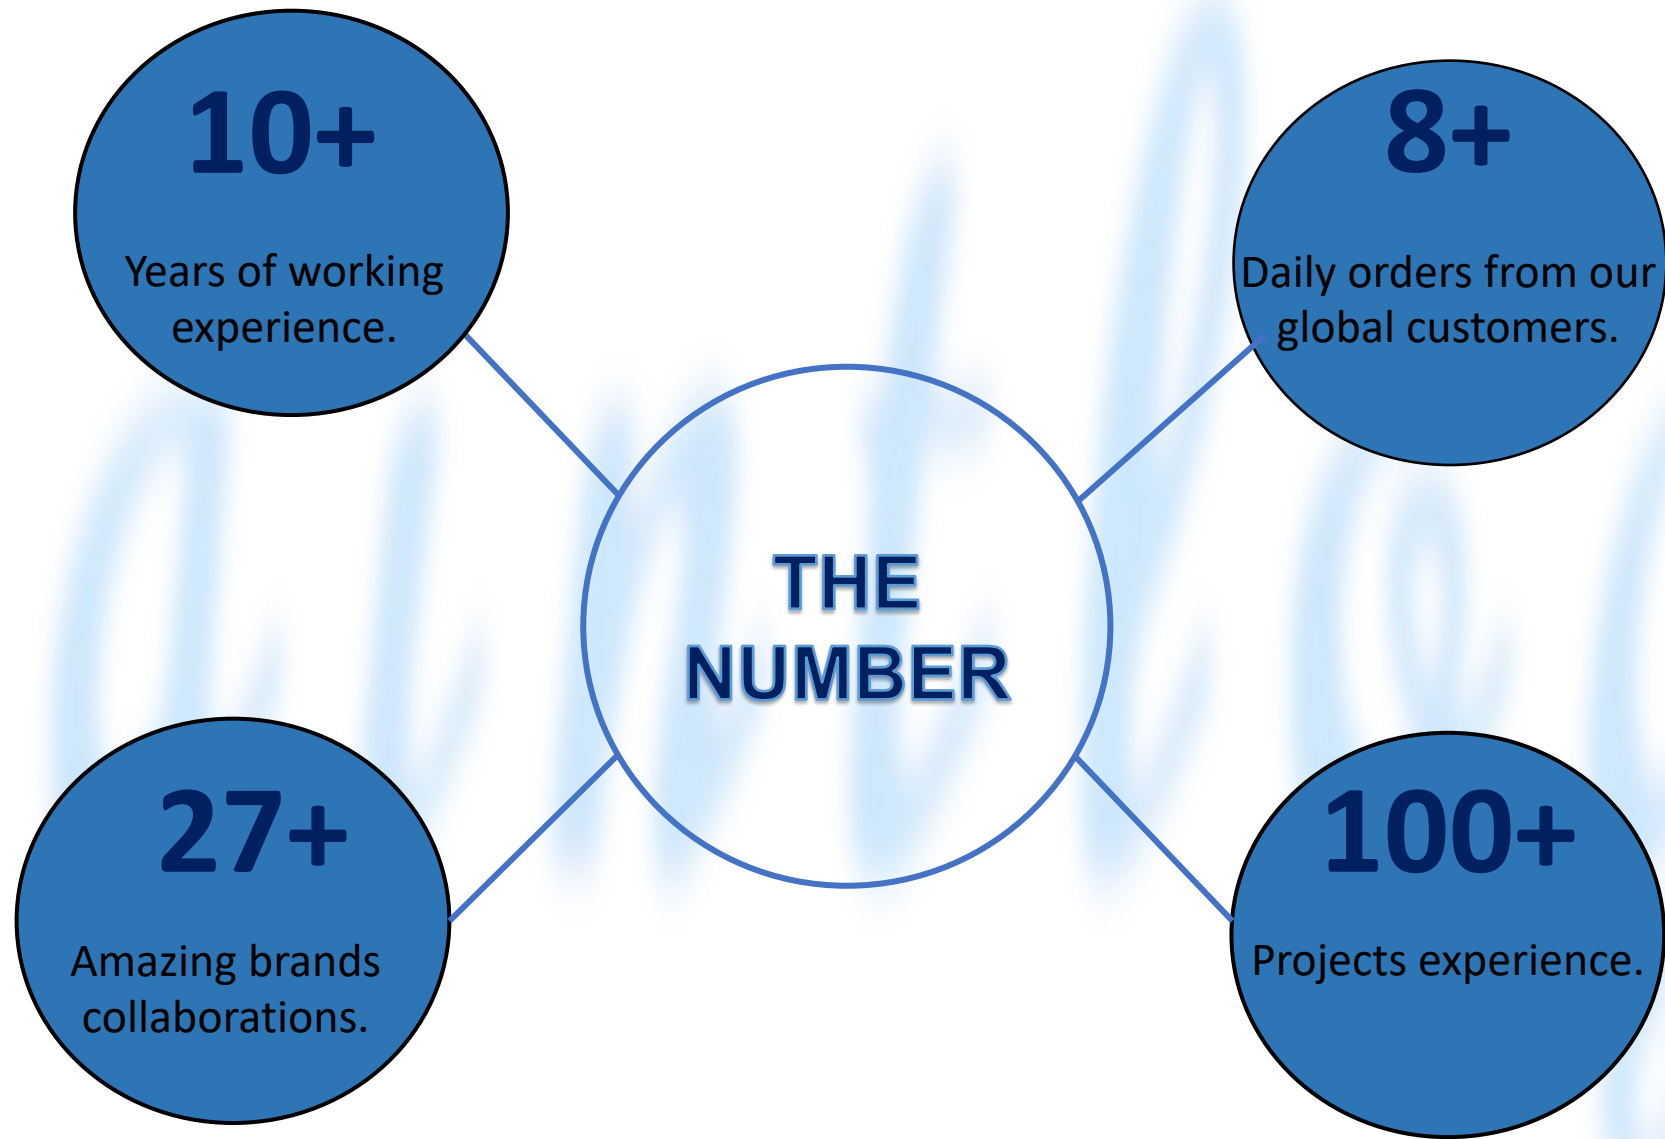

Saintloga was established in Tianjin, China in 2015, and is a professional service provider dedicated to offering engineering solutions for wind power operators.

With **10+ years** of in-depth experience in the wind power industry, we not only deliver comprehensive industry solutions but also take pride in being your trustworthy strategic partner, backed by reliable and cost-effective services.

"Focusing on customer needs and providing enthusiastic, efficient, and sustainable services" is our core commitment that we always adhere to.

What we do?

- ✓ Robust Spare Parts Supply Chain
- ✓ Professional Installation & Commissioning
- ✓ Comprehensive Retrofit & Technical Support
- ✓ Reliable Operation & Maintenance (O&M)

our vision

Integrate global resources to provide outstanding services and customized solutions for the global wind power industry, and strive to become a leader in the global new energy service sector.

To deliver reliable, efficient, and cost-effective repair solutions to the wind power industry, ensuring optimal performance and maximizing the operational lifespan of turbine assets.

our mission

KEY PERSON

Meet the Global Team. Leading the way in advancing global wind energy solutions across China, Vietnam, Thailand, Spain...

The team boasts expertise across continents, with a global network of experts driving innovation and progress.

Pei Jingyan

CEO

Wang Xuewei

Sales Director

Wang Xiaolin

Overseas Sales Manager

TEAM BUILDING

Team building boosts our collaboration, improves customer service, cuts hidden supply chain costs, enhances risk resistance and innovation, and stabilizes overall business progress.

Wind Energy Exhibition

We actively participate in wind energy exhibitions, connecting with customers, gaining tech insights, enhancing brand credibility and assessing trends to expand cooperation, strengthen competitiveness, and lay a solid foundation in the wind power industry chain.

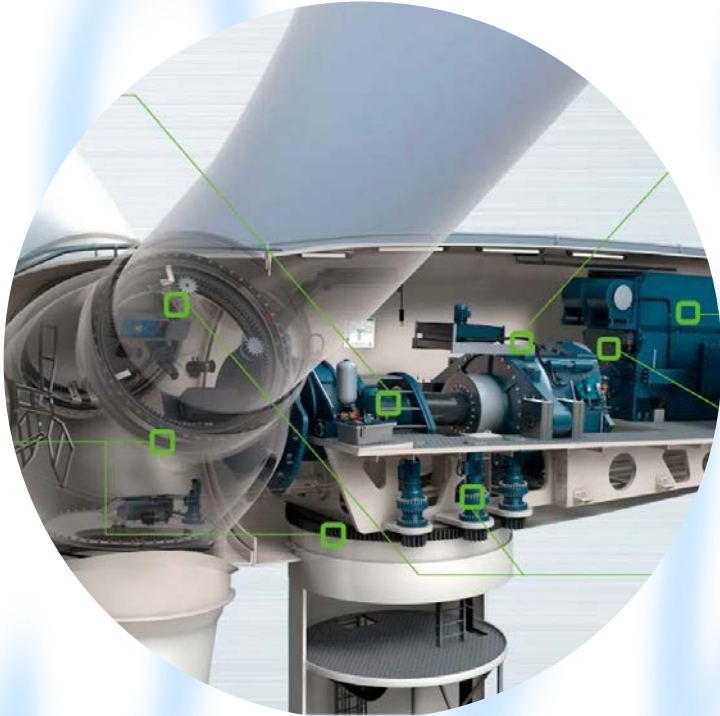

SKF RIR400+ LAUNCHING

Attending the Global Launching Ceremony of SKF's RIR400+ Wind Power Main Bearing Reliability Test Platform.

Our company stands at the forefront of the industry, keeps pace with development trends, and actively participates in every key node of the industry's development.
