

CARBON LINK AI
碳环智造

Cost-effective life science instruments
and equipment global supplier

Expert in nanometre Magnetic bead separation

About Carbonlinkai

CarbonLinkai was founded in 2020 and is headquartered in Shenzhen, China. The company is committed to becoming a global supplier of high-performance, cost-effective life science instruments and equipment, providing import substitution solutions.

Guided by the principles of cross-disciplinary integration and innovation, along with a close focus on clinical needs, CarbonLinkai delivers highly sensitive and accurate digital solutions, instruments, software, consumables, reagents, and scientific technical services for clinical diagnostics, life sciences, biochemistry, molecular biology, cell biology, and immunobiology. Through innovative, high-performance, and cost-effective products and solutions, CarbonLinkai aims to help people worldwide improve medical conditions and reduce healthcare costs.

About Carbonlinkai

Currently, CarbonLinkai has become the preferred partner for leading NGS and medical testing enterprises, establishing strong cooperative relationships with numerous reputable medical institutions and life science companies. **we has become a long-term supplier to companies including MGI,BGI, Vazyme, yeabio, Novogene,GenScript etc.** CarbonLinkai has also accumulated a significant client base among research institutions and top-tier hospitals, such as: The Fifth Affiliated Hospital of Sun Yat-sen University, The First Affiliated Hospital of Guangzhou Medical University, PUMC Hospital, Tsinghua University, and Shanghai Jiao Tong University.

Carbonlinkai Core Team Introduction

陈瑾睿

Founder & General Manager

Main functions and achievements

- Worked at BGI Group for ten years
- Partner of KingMed Diagnostics sub project
- Having rich experience in research and development, application, and marketing

陈叶 (sophia)

Co founder & Marketing Director

Main functions and achievements

- Formerly served as the brand leader of Kangkang Internet platform (1 billion annual turnover)
- Proficient in 0-1 building brand and creating well-selling products

周延

Director of Research and development

Main functions and achievements

- With 20 years of hardware research and development experience, he has successfully led the team to overcome many technical problems, promoted the company to the forefront of the industry

王文博

Quality Control Manager

Main functions and achievements

- Establish a full process quality control system, take the lead in filing and subsequent certification, optimize testing efficiency to increase by 40%, and reduce error rate to 0.06%

China Magnetic rack plate Sales Champion Carbonlinkai

ADVANTAGES

- ~ Industry-leading bead capture
- 🚀 few second Separation
- 🏠 >99% Bead Recovery
- 💎 As good as Internationally renowned brands
- 💰 Less than 1/3 of the price

**A leading NGS company using CarbonLinkai magnetic rack can
save over 3 million+ RMB annually**

Carbonlinkai Core Advantage

**quality and performance
surpassing international standards**

- Precision-engineered fields via AI modeling – eliminates dead zones**
- Adopting multi gradient annular magnetic pole array to ensure uniform and powerful magnetic field**
- Aerospace-Grade NdFeB Magnets**
10 year negligible loss of magnetic strength

Wide range of application scenarios:

-  DNA/RNA Extraction
-  Stem Cell Isolation
-  IVD Assays –
-  CRISPR Workflows –
-  Protein purification (His-tag, GST-tag)
-  Immunoprecipitation (Co-IP, ChIP)
-  cell sorting-High cell survival rate
-  Works with any magnetic beads-based purification kit

Zero carryover

Gentle yet complete capture

High stability and consistency

High experimental

success rate

Easily adsorb nano magnetic beads

China Sales Champion: Market Choice, Quality Witness!

Excellent performance

Ultimate cost-effectiveness

Reliable and durable

Widely applicable

easy to pipetting

Carbonlinkai Core Advantage

China Magnetic rack/plate Sales Champion Carbonlinkai

 2024 Lab Equipment Excellence Award

 15,000+ Units Sold in 12 Months

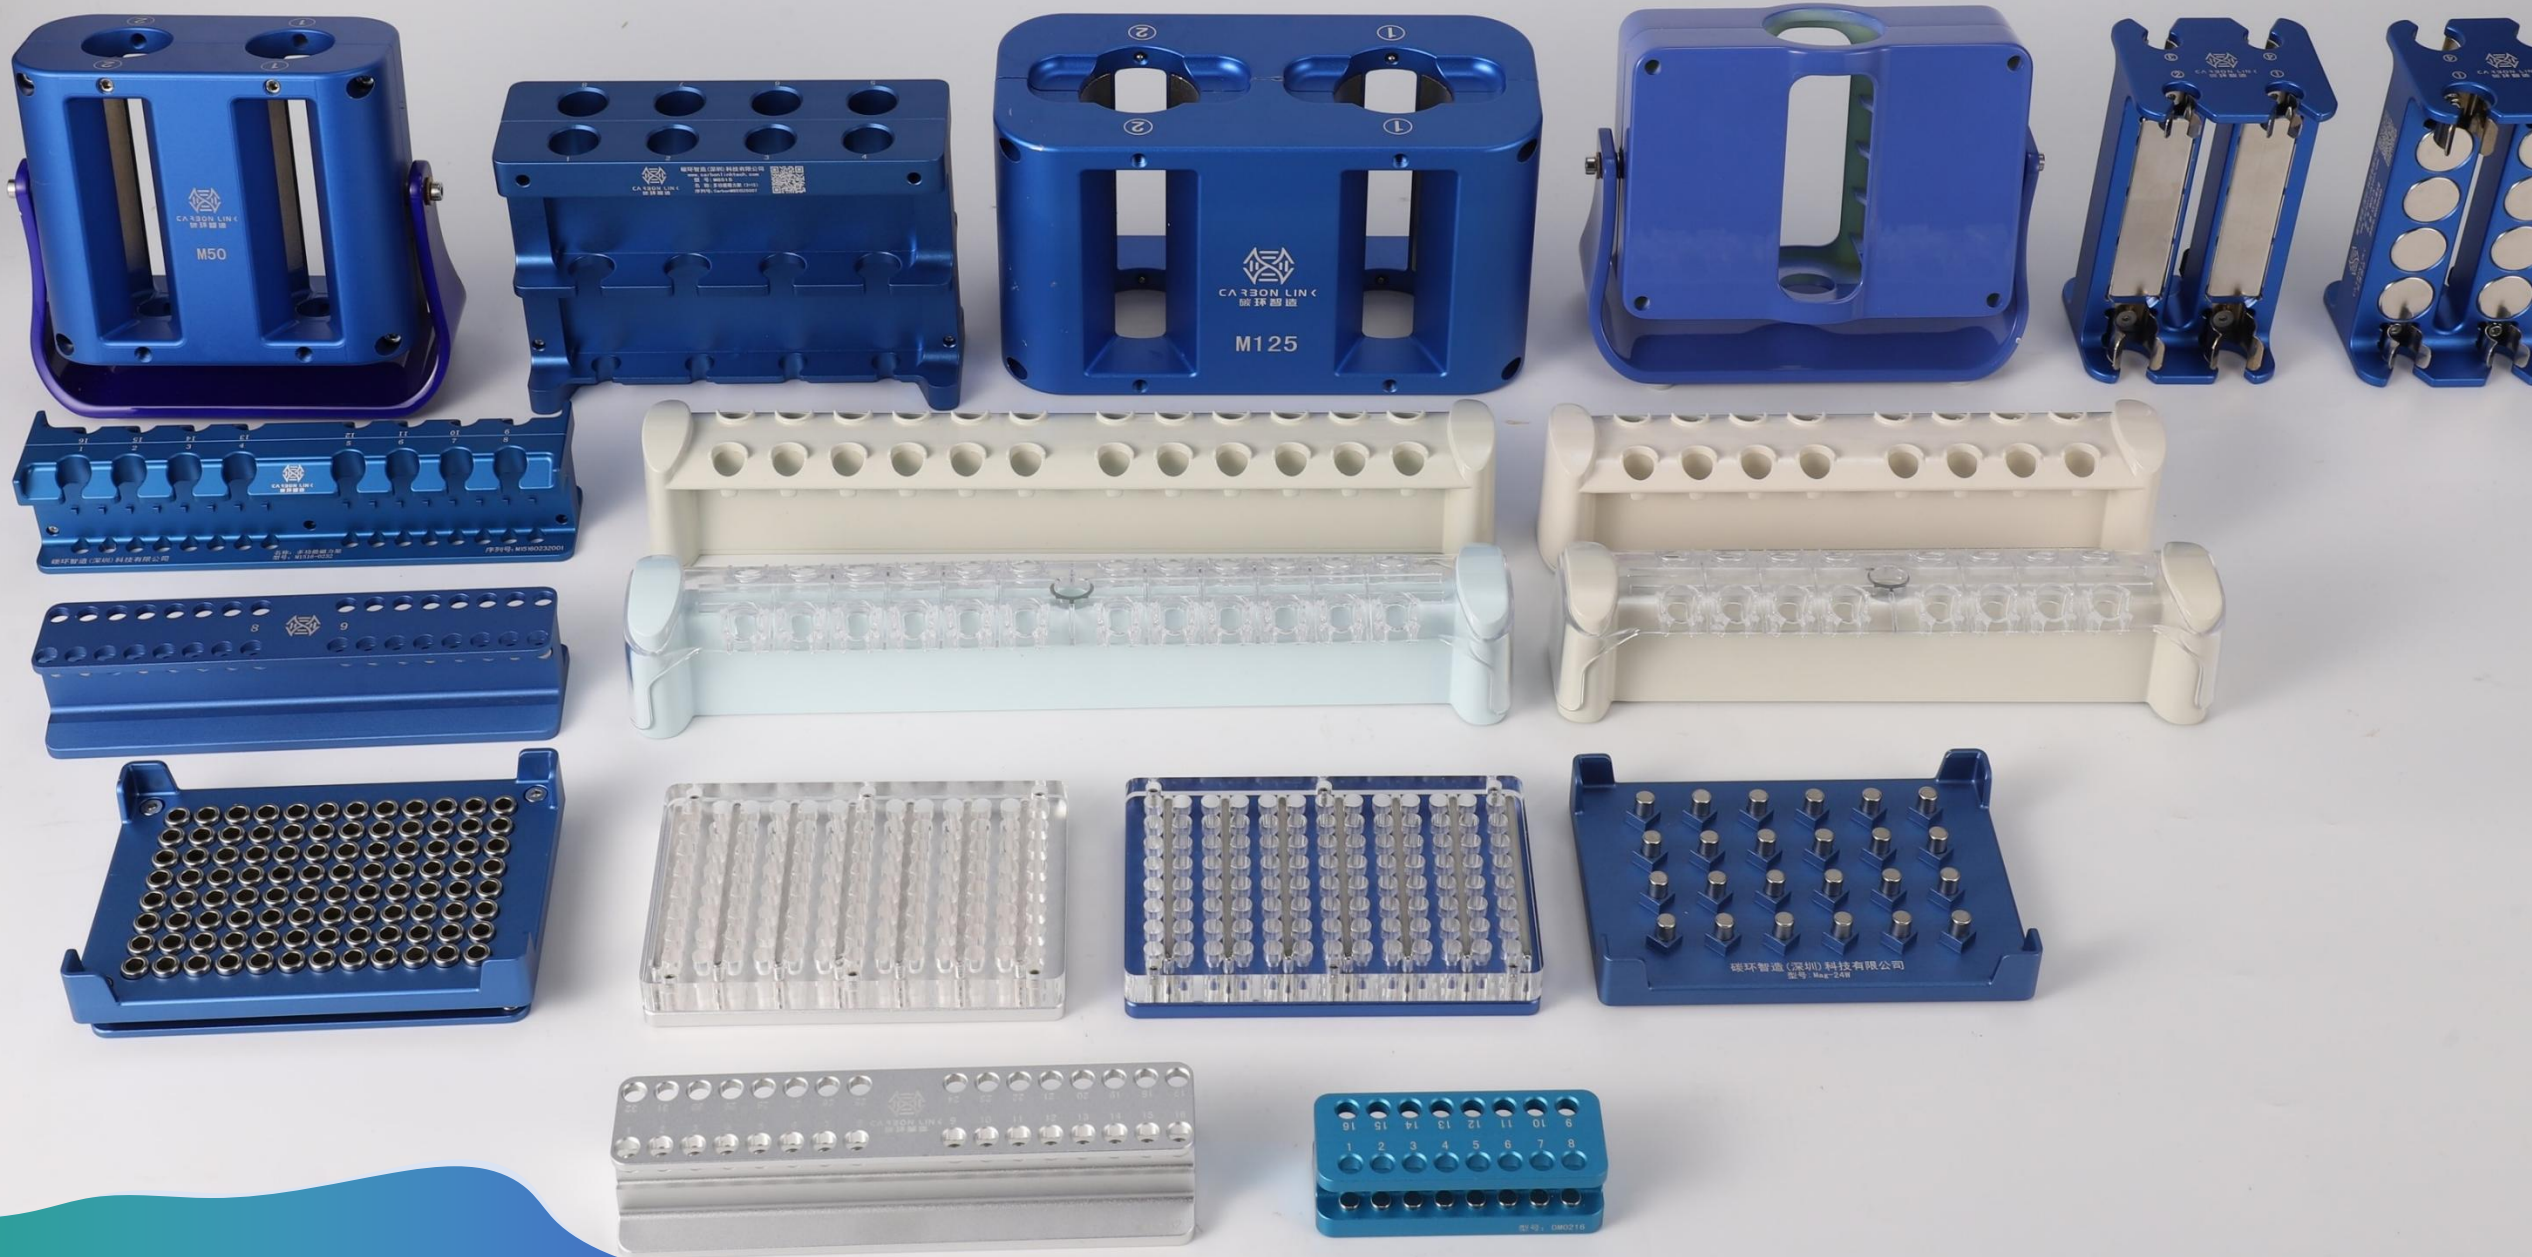

Carbonlinkai Core Advantage

Common Choice for Leading NGS and Medical Testing Companies

- 📦 Exported to 12 countries
- 🏠 repurchase rate 83%
- 👍 referral rate of over 40%+
- 🤝 Collaboration with over 3000 laboratories and enterprises

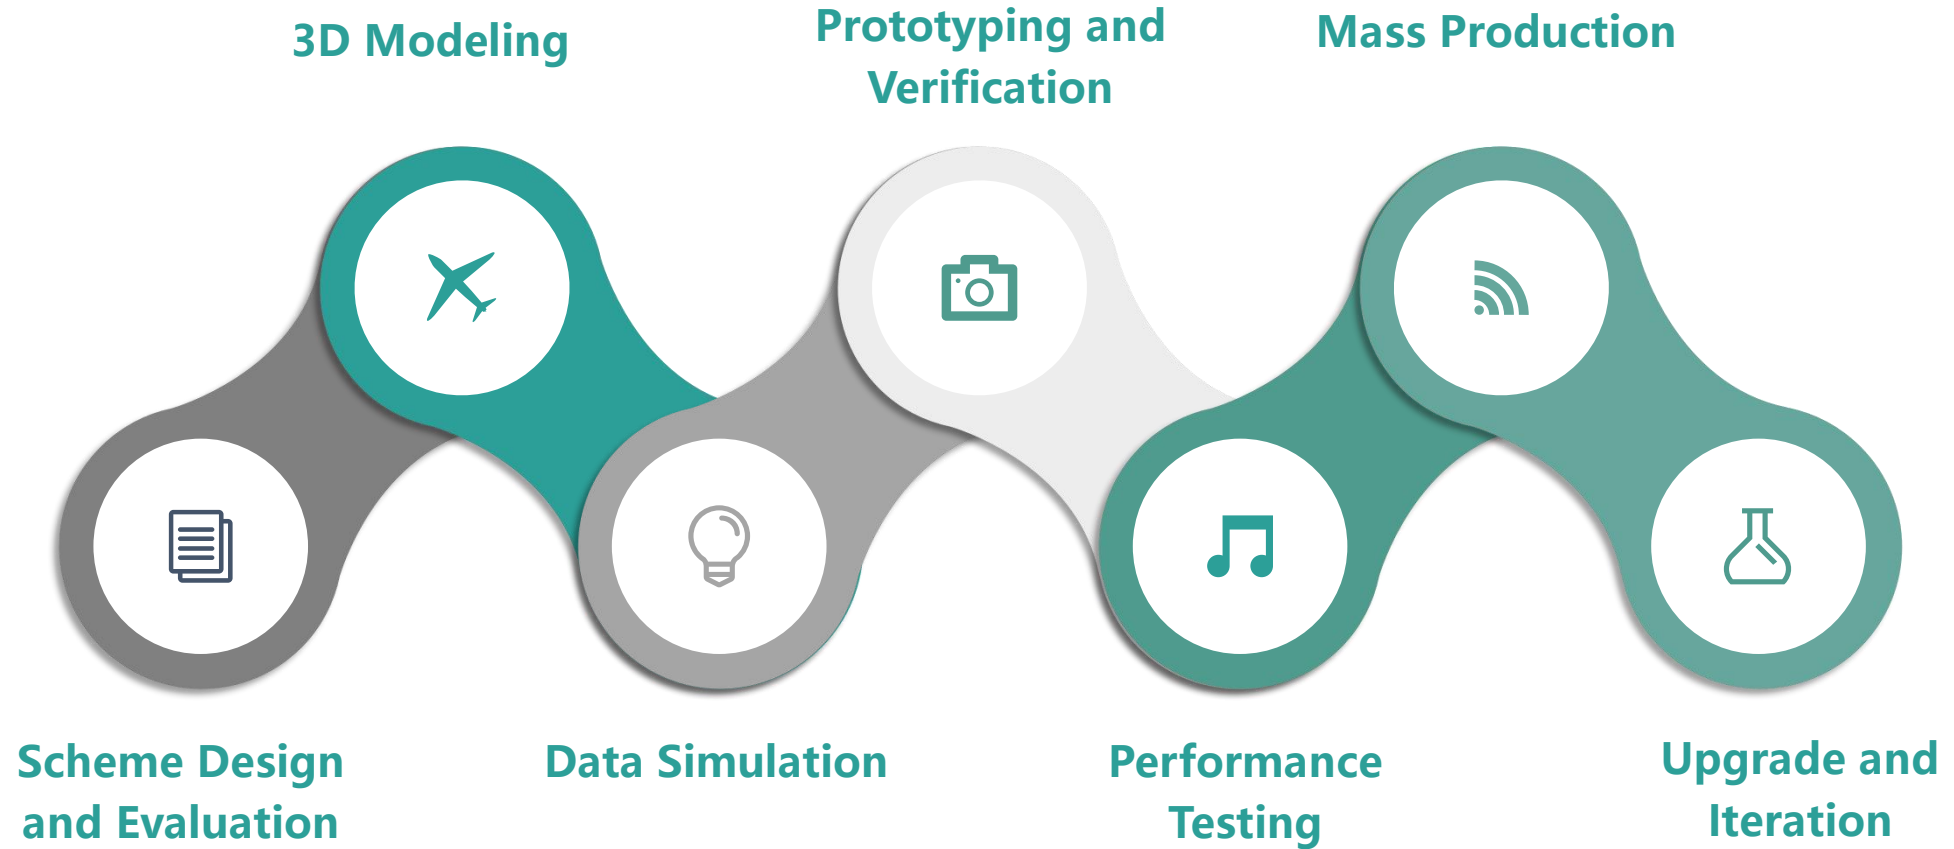

Carbonlinkai Product Series: Nanomagnetic Expert Magnetic rack (0.2ml~1000L)

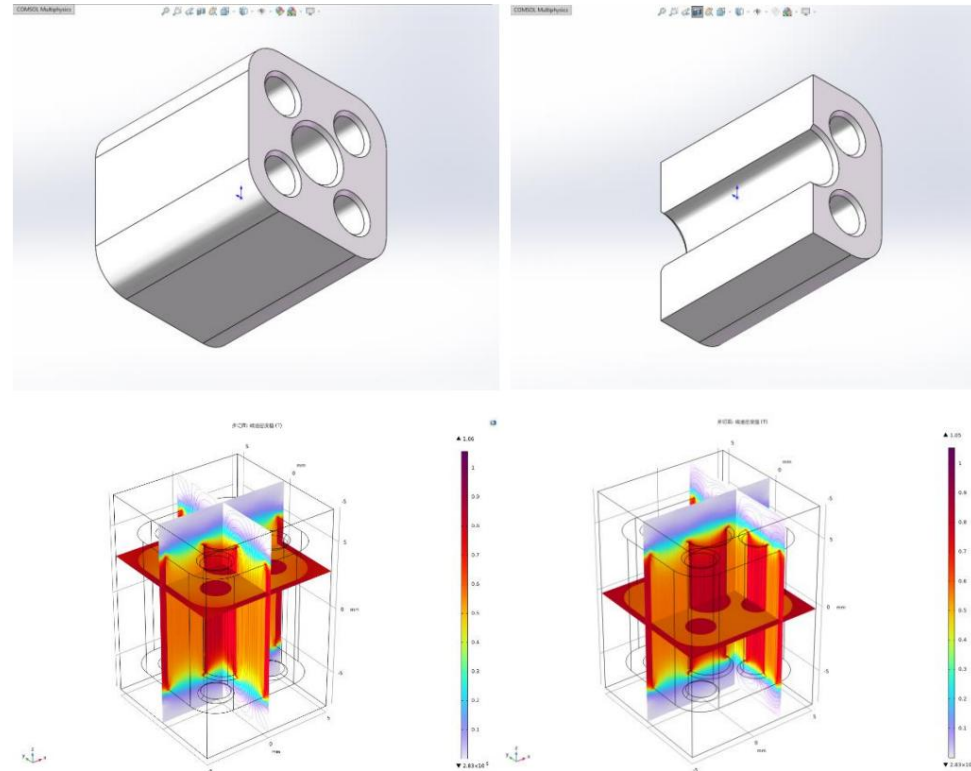

Carbonlinkai Magnetic Rack R&D and Production Process

Carbonlinkai Magnetic Rack R&D and Production Process : Magnetic Field Simulation

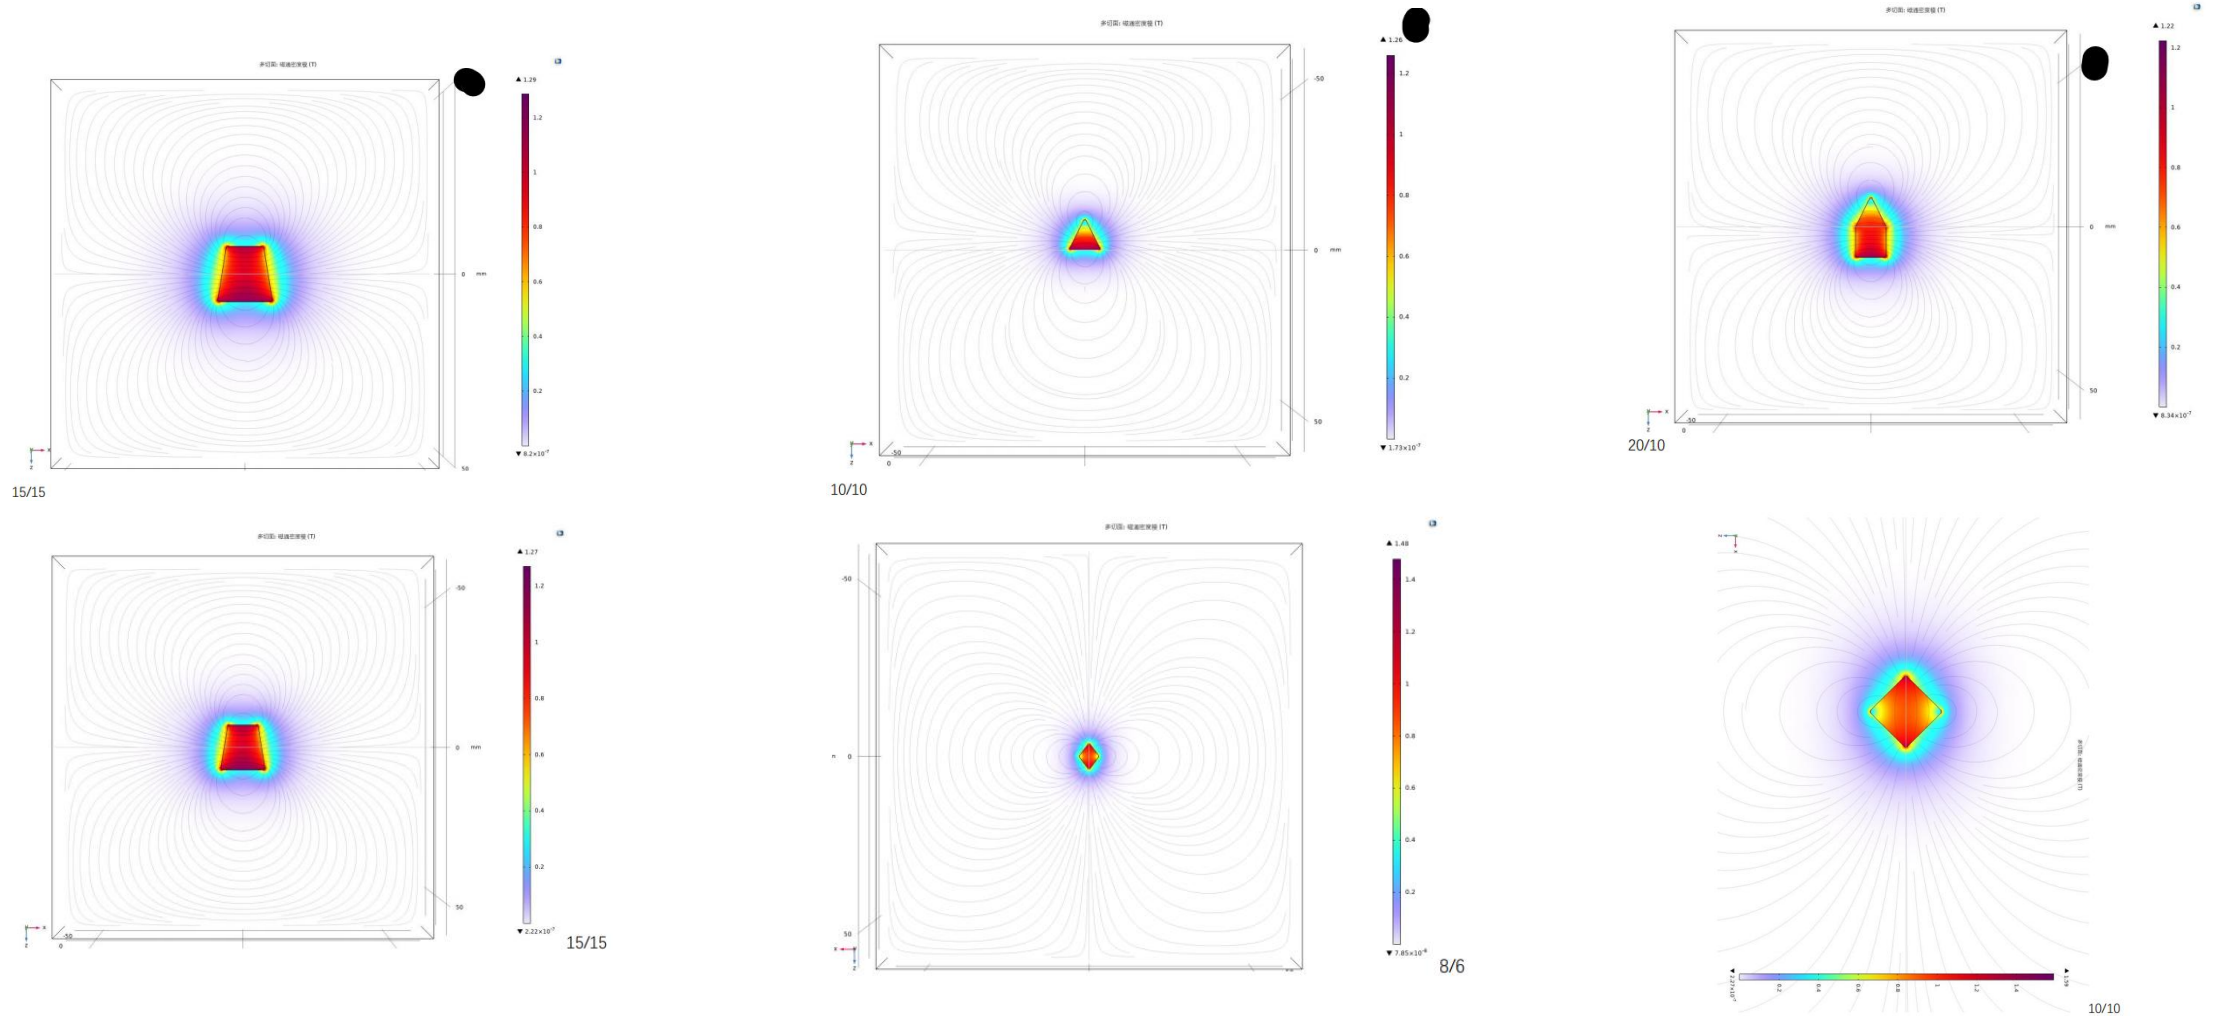

标准型贯通:

Material Design of a Magnetic Rack Compatible with 384 - Well Plates, 96 - Well PCR Plates, and 96 - Well Deep - Well Plates

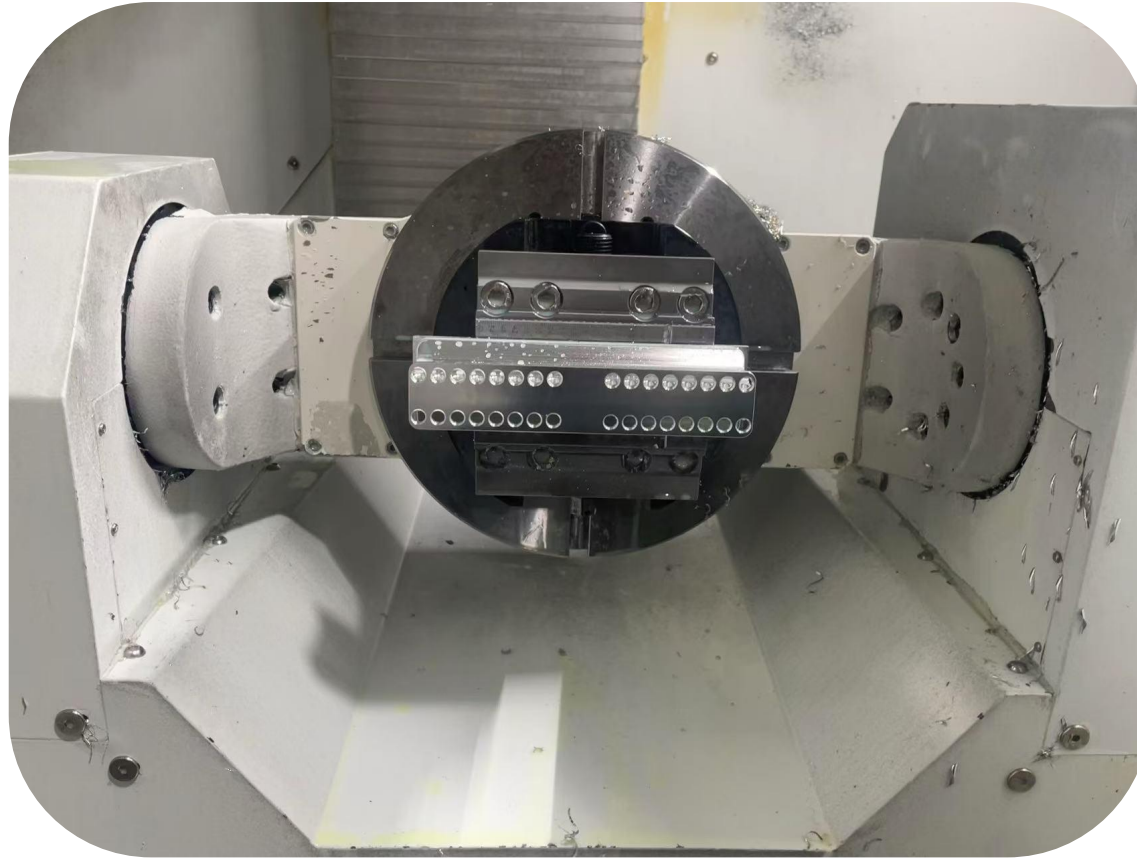

Carbonlinkai Magnetic Rack R&D and Production Process: Theoretical Verification

Material Design of Magnetic Rack for Large - Volume 96 - Well Deep - Well Plates

Carbonlinkai Magnetic Rack R&D and Production Process: Rapid Prototyping

In terms of machining: 5 five - axis CNC machine tools and 6 three - axis CNC machine tools accelerate the R&D of product samples, enabling the monthly production capacity of machined parts to easily exceed 1,500 pieces.

Carbonlinkai Product Series: Intelligence Vacuum centrifugal concentrator

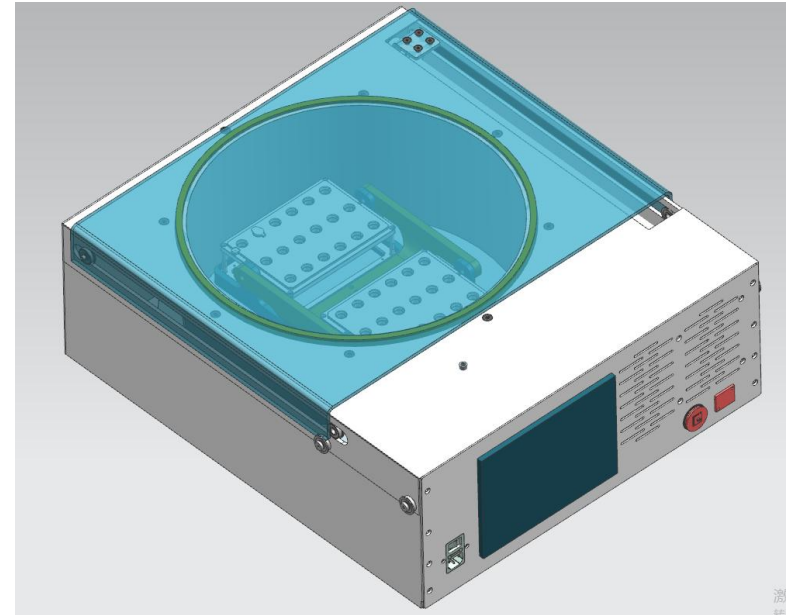

Carbonlinkai Product Series: Intelligence Vacuum centrifugal concentrator

Manufacturer	Carbonlinkai				Eppendorf				Carbonlinkai				Eppendorf																																											
Model	CV100 - TH				Concentrator Plus				CV100 - TH				Concentrator Plus																																											
Solvent	Nuclease - free water																																																							
Original Volume	100				20				10																																															
Centrifuge Tube	0.2mL PCR Tube																																																							
Concentration Time (min)	10																																																							
Temperature	45°C																																																							
Adapter	Not equipped				Short				Short				Short				Not equipped				Short				Long				Short				Long																							
Remaining Volume (µL)	63.2				69				68				70				5.3				4.9				8.9				7.9				9.2				0				0				1.4				1.6				2.8			

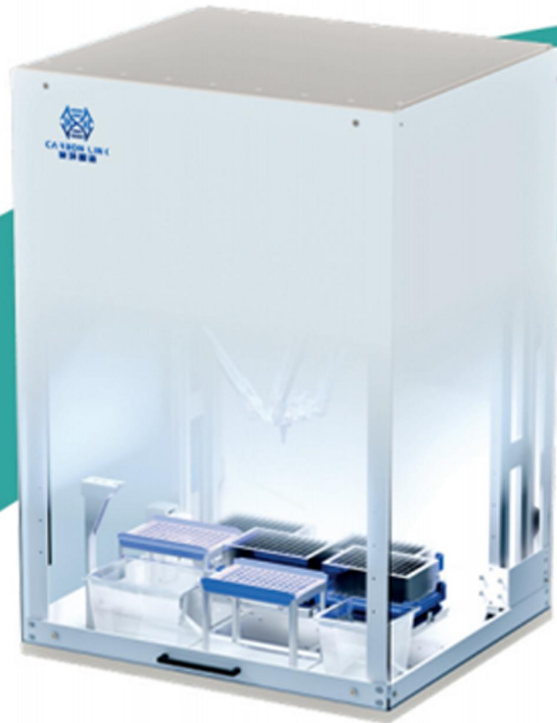

Under the same conditions, the concentration efficiency of CV100 - TH is higher.

Carbonlinkai Product Series: Fully automatic vacuum centrifugal concentrator

- Empower the whole - process automation of NGS with “samples in, results out” and empower the whole - process automation of hybrid capture.
- Vacuum centrifugal concentration is applied to next - generation sequencing and DNA storage projects.

Carbonlinkai Product Series: Automated Pipetting Workstations

Automated Pipetting Workstations
Make liquid handling more efficient and simpler.

China Magnetic rack Sales Champion
carbonlinkai help companies reduce %60 costs

Flexible pipetting

Replace manual

Efficient pipetting

Easy to use

modular design

Easily expand

Intelligent communication

Custom programming

3 - Year Strategic Plan:
cost-effective life science instruments and
equipment global supplier

Carbonlinkai Market Basic Situation

Continuous Growth Against the Trend for 3 Years

Since the pandemic restrictions were lifted in 2023, Carbonlinkai achieved 2 - fold growth in 2024 compared to 2023. In Q1 2025, it realized 2 - fold growth compared to 2024. [The growth rate and business turnover have currently met the criteria for applying to be a high - tech enterprise.](#)

The Market Fundamental Disk Is Very Stable

Positive Review Rate (Active):
98% +

Repurchase Rate: 83% +

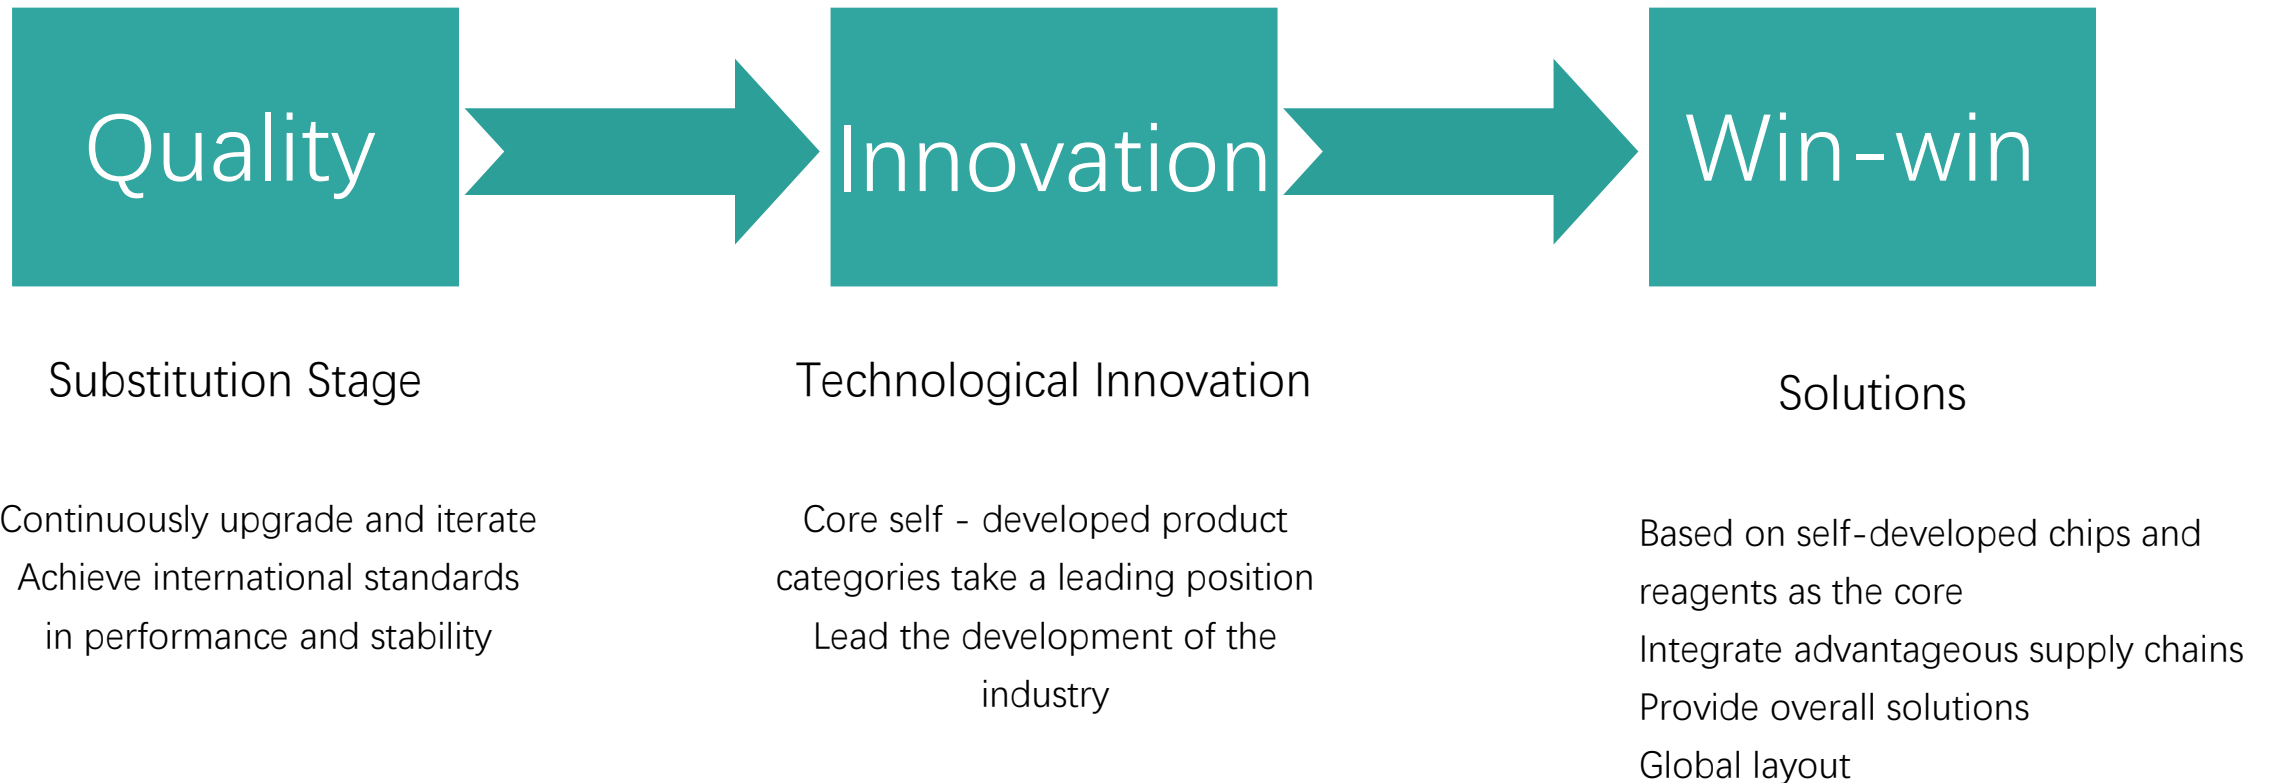

Referral Rate:
40% +

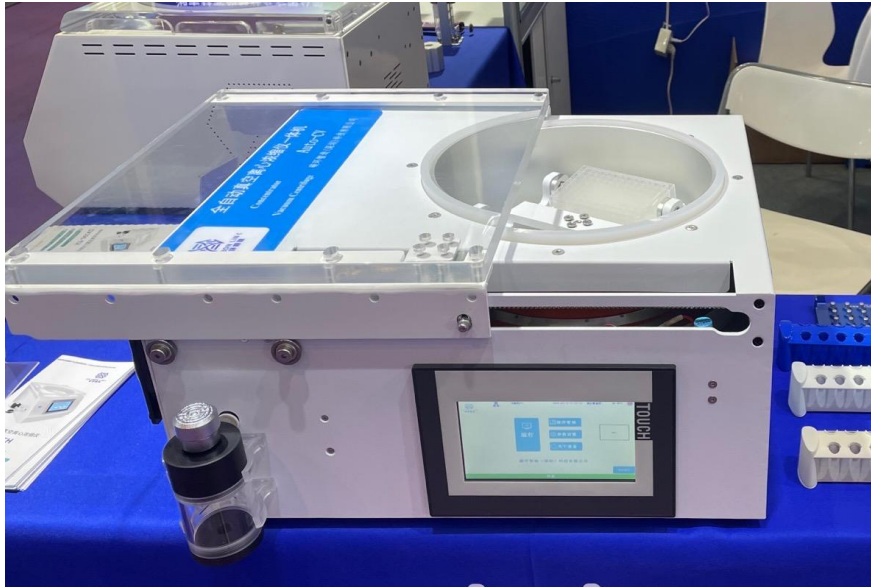

Magnetic Effect Driving Consultations for Other Product Categories: 23% +

Carbonlinkai Strategic Planning Outline

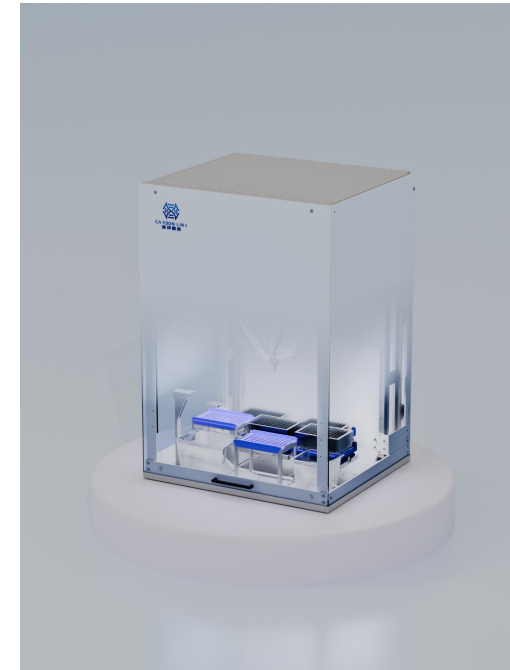

Carbonlinkai Strategic Planning Product Expansion Direction 1: Self-Developed Standard NGS Laboratory Automation Equipment + Customization/OEM Services

Fully automatic vacuum centrifugal concentrator

Carbonlinkai Automated Pipetting Workstations

Carbonlinkai Strategic Planning Product Expansion Direction 2 : Integrate Superior Supply Chains via **OEM** to Provide Customers with Holistic Solutions

● Strategic Planning and Market Direction of Carbonlinkai

Based on the current customer volume and the reputation and experience accumulated from the best - selling magnetic rack products, conduct global marketing and sales.

Self-developed sequencer chips and reagents, automated equipment, integrated supply chain to improve NGS solutions
