DESIGN

Guided by user needs, we provide full-process services from conceptual design to detailed implementation

ENGINEERING

Through the EPC model, we integrate resources and optimize costs.

SUPPLY CHAIN

A global strategic cooperation network of high-quality suppliers enables the integrated response to material procurement and logistics distribution

SHOULDER

Professional Provider of Comprehensive Solutions for Lightweight Prefabricated Buildings

Production

In-House Production Bases Enabling Modular Manufacturing

Construction

Our construction team possesses global construction capabilities and has completed a total of 4,000 engineering projects.

Operation

We operate hotels under a standardized system and refine every detail through end-to-end services

Shoulder has an in-house team covering the entire industrial chain, from design, R&D, production and construction to operation.

Management Headquarters Shenzhen Office

The management center has a professional supply chain team providing the highest quality procurement support from a professional perspective. Global customer satisfaction is Shoulder's ultimate goal!

Marketing Headquarters Guangzhou Office

Shoulder has a highly professional business team. Over 17 years of growth, we have provided professional services to customers in more than 131 countries and regions globally.

R&D Center Zhengzhou Office

Shoulder's R&D Center has delivered satisfactory projects to owners in over 131 countries worldwide, providing customers with top-tier, cutting-edge services.

East Africa Branch Tanzania Office

From our Shenzhen headquarters to our overseas base in Tanzania, Shoulder evaluates needs with an international perspective to create commercial value that exceeds expectations for our global clients.

Production Center Qingyuan Factory

The solid foundation of Shoulder's entire industry chain. Relying on flexible production lines and full-process quality control, we accurately bring forward-looking designs to life, ensuring the high-standard execution of global projects.

Roof Cover

High-strength waterproof, corrosion-resistant

Roof Purlin

Galvanized steel, strong and stable

Gable End Cover

Waterproof, sealed, and aesthetic

Gable Hanging Pipe

Galvanized steel, stable and reliable

Gable Side Column

Galvanized steel, supports gable structure

Sidewall Cover

Waterproof, easy to install and replace

Corner Load-bearing Column

Reinforced design, enhanced load capacity

Rafter Beam

Sloped design, increased strength and stability

Ridge Safety Rod

Connects rafters, enhances overall stability

Eave Safety Rod

Connects walls, improves wind resistance

Load-bearing Column

Galvanized steel, strong and durable

Reinforced Horizontal Beam

Strengthened design, improved overall stiffness

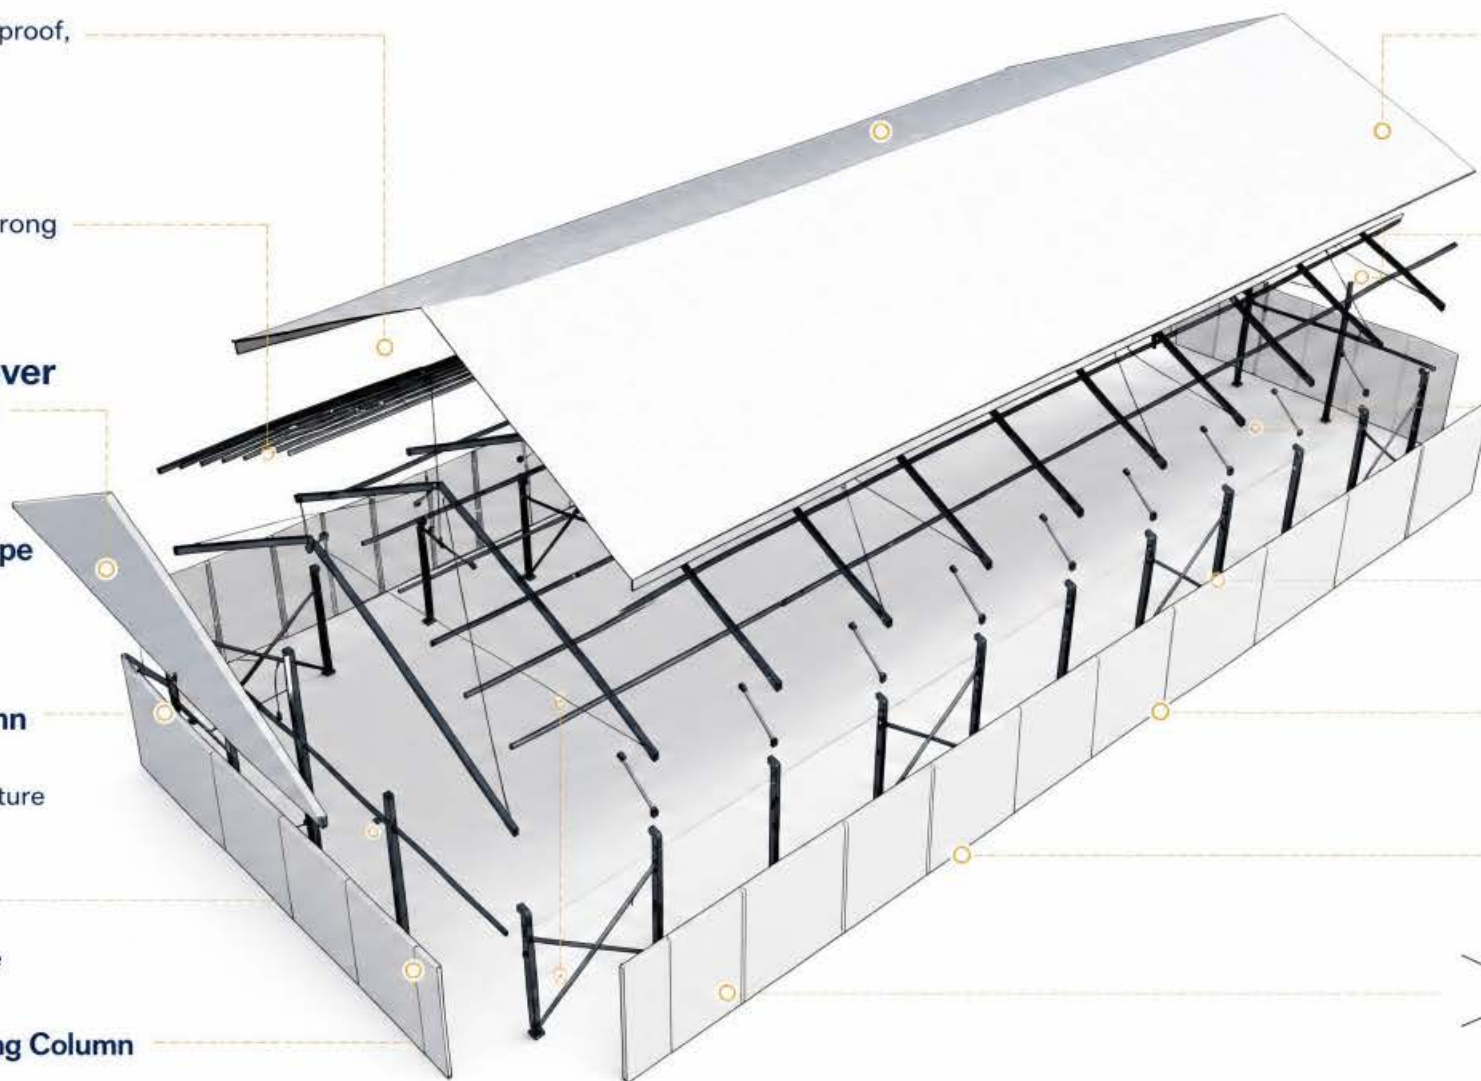

Cross Bracing

Cross support, enhances stability

Roof Steel Cable

Steel tension cable, improves structural stability

Membrane System

Imported PVDF membrane material with high strength, fire resistance, UV protection, and long lifespan.

Pressurization System

Intelligent constant pressure control for stable, efficient, and energy-saving operation.

Power Distribution System

Intelligent management, safe and reliable power supply operation.

Exhaust Vent

High-efficiency exhaust system for fresh air circulation and comfort.

Temp & Sound Control System

Intelligent temperature and acoustic control for optimal comfort and quiet environment.

Lighting System

High-efficiency LED lighting for energy savings and excellent illumination.

Steel Cable System

High-strength steel cables ensure structural stability and wind resistance.

Skylight

Natural light design for energy efficiency and improved brightness.

Custom Logo

Professional branding to enhance identity and value.

Emergency Exit

Emergency exits ensure safety and fast evacuation.

Anchoring System

Professional anchoring design for stability and strong wind resistance.

Rotary Door

Rotary door design for windproof, heat-insulated, and easy access.

Rapid-Assembly Air Dome Warehouse

PREFABRICATED SPORTS HALL

High-performance sports spaces built for durability, comfort, and all-season use.

1. Aluminum Tent Series
2. Prefabricated Storage Warehouse
3. Prefabricated Sports Hall
4. Prefabricated Hotel
5. Prefabricated House
6. Special-Shaped Steel Structures

ROOF COVERING

PVDF membrane material, durable, corrosion-resistant, and long-lasting

ROOF PURLIN

Galvanized steel, stable and rust-resistant, safe and reliable

TRUSS

Optimized design, high strength, sturdy and aesthetically pleasing

ROOF INSULATION

High-performance insulation system, enhances overall stability and energy efficiency

SAFETY NET FRAME

Prevents objects from falling, enhances safety, strong and durable

COURT BARRIER

PC board panel, impact-resistant, weatherproof, and secure

NETTING

High-strength PE or nylon net, impact-resistant, deformation-resistant

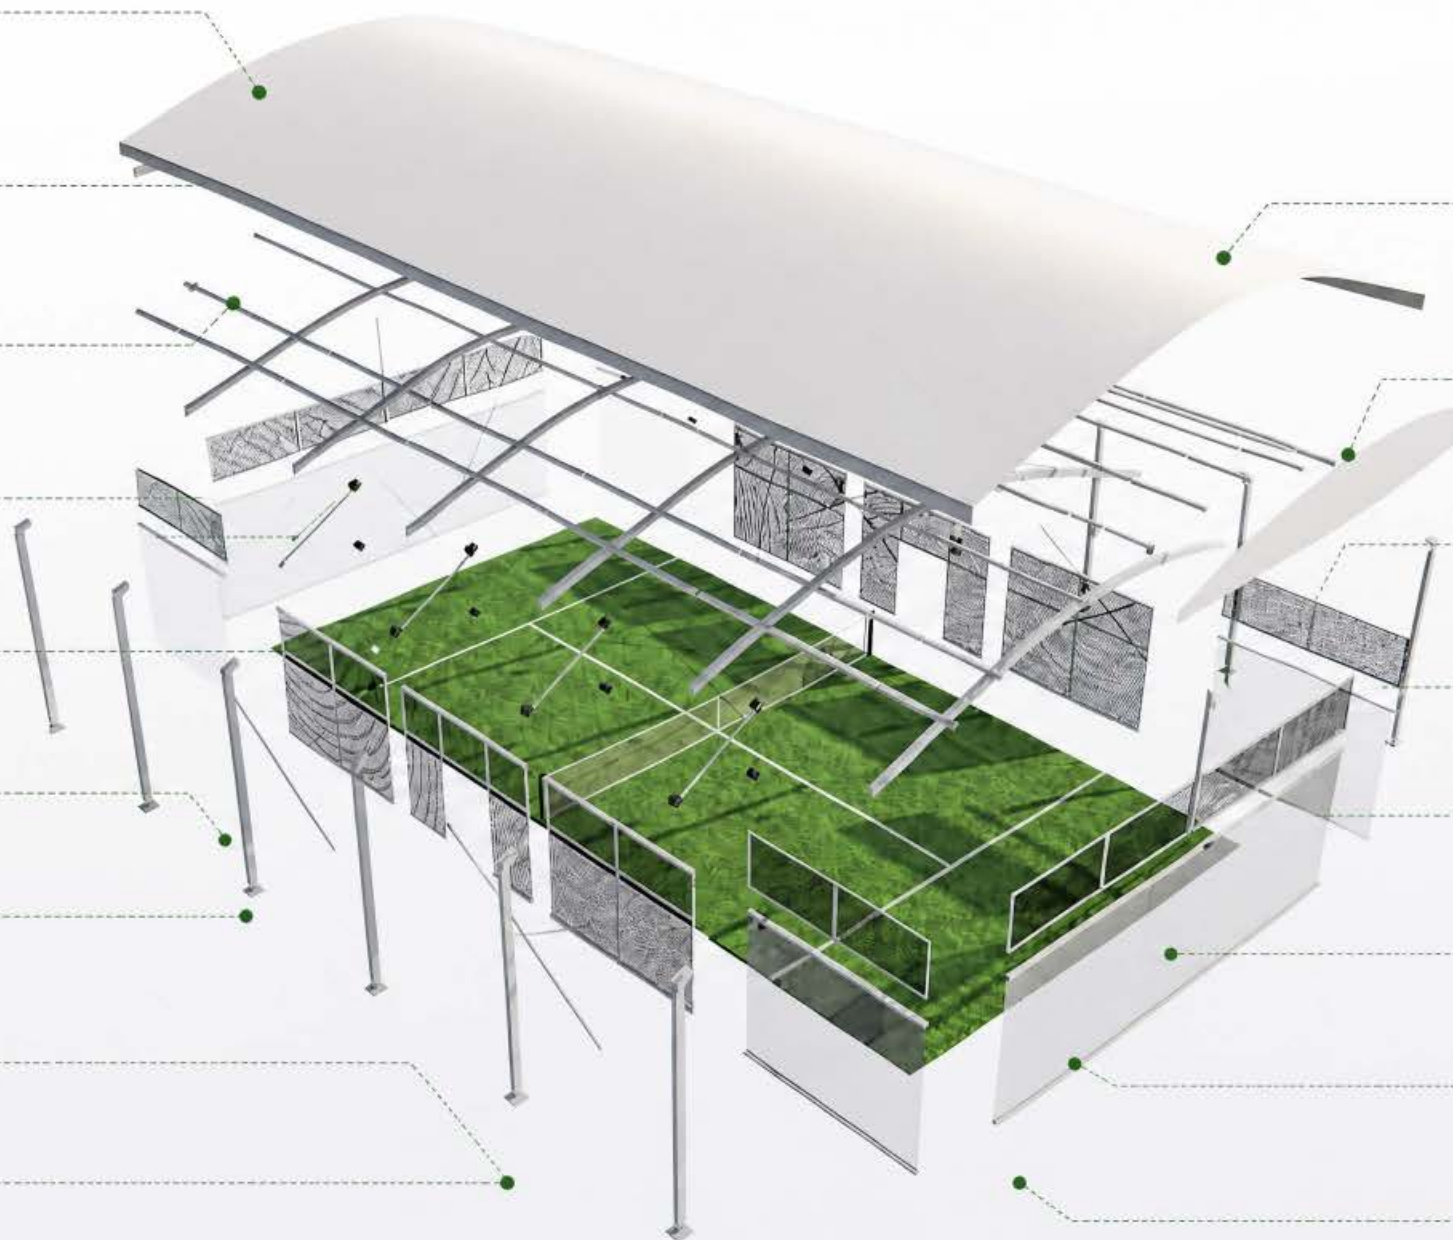

CROSS BRACE

Enhances structural integrity, ensures stability and safety

STEEL COLUMN

Steel structure column, high load-bearing capacity, corrosion-resistant and durable

MEMBRANE

High-strength tensile membrane, high light transmittance, energy-efficient and eco-friendly

LIGHTING

LED energy-saving lights, high brightness, energy-efficient and durable

FENCING SYSTEM

Modular fencing, secure and anti-climbing, open visibility

WALL COLUMN

Galvanized steel, stable and reliable, corrosion-resistant

FLOORING

Artificial turf system, wear-resistant, drainage-friendly, comfortable

GLASS WALL

Tempered glass, strong and transparent, stable and reliable

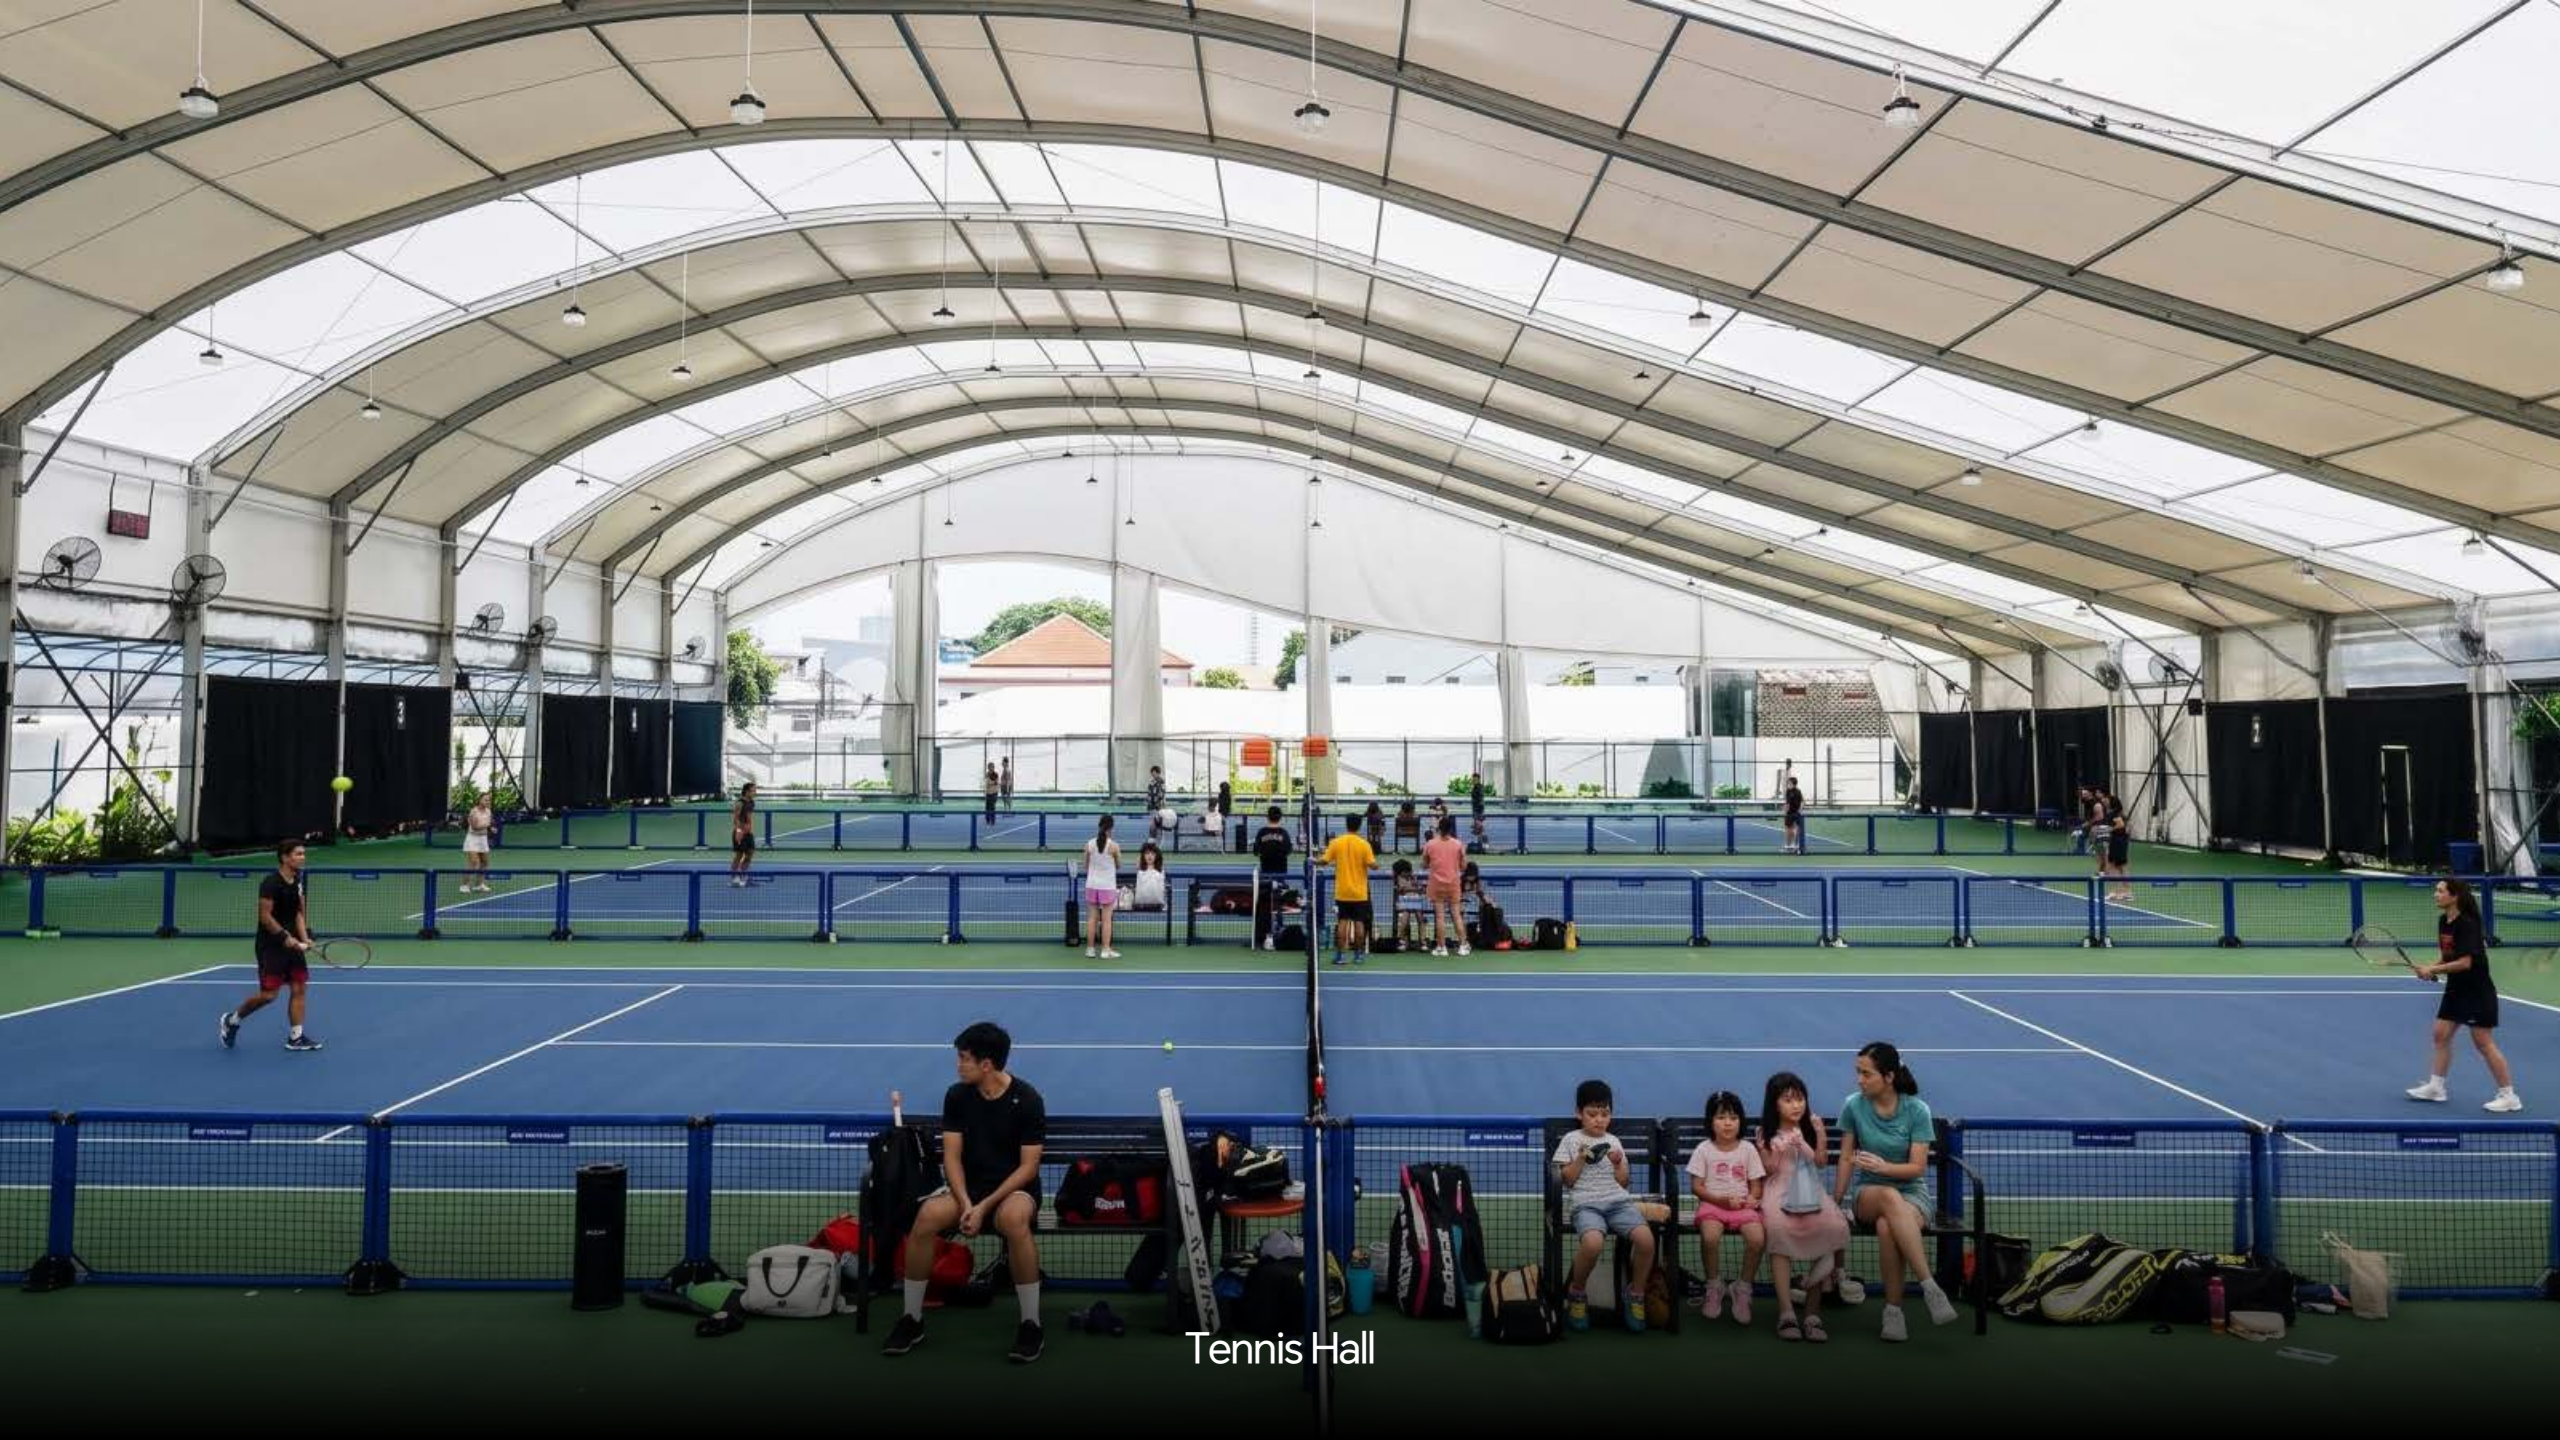

TEMPERED GLASS

Tempered glass panels, impact-resistant and safe clear visibility and beautiful

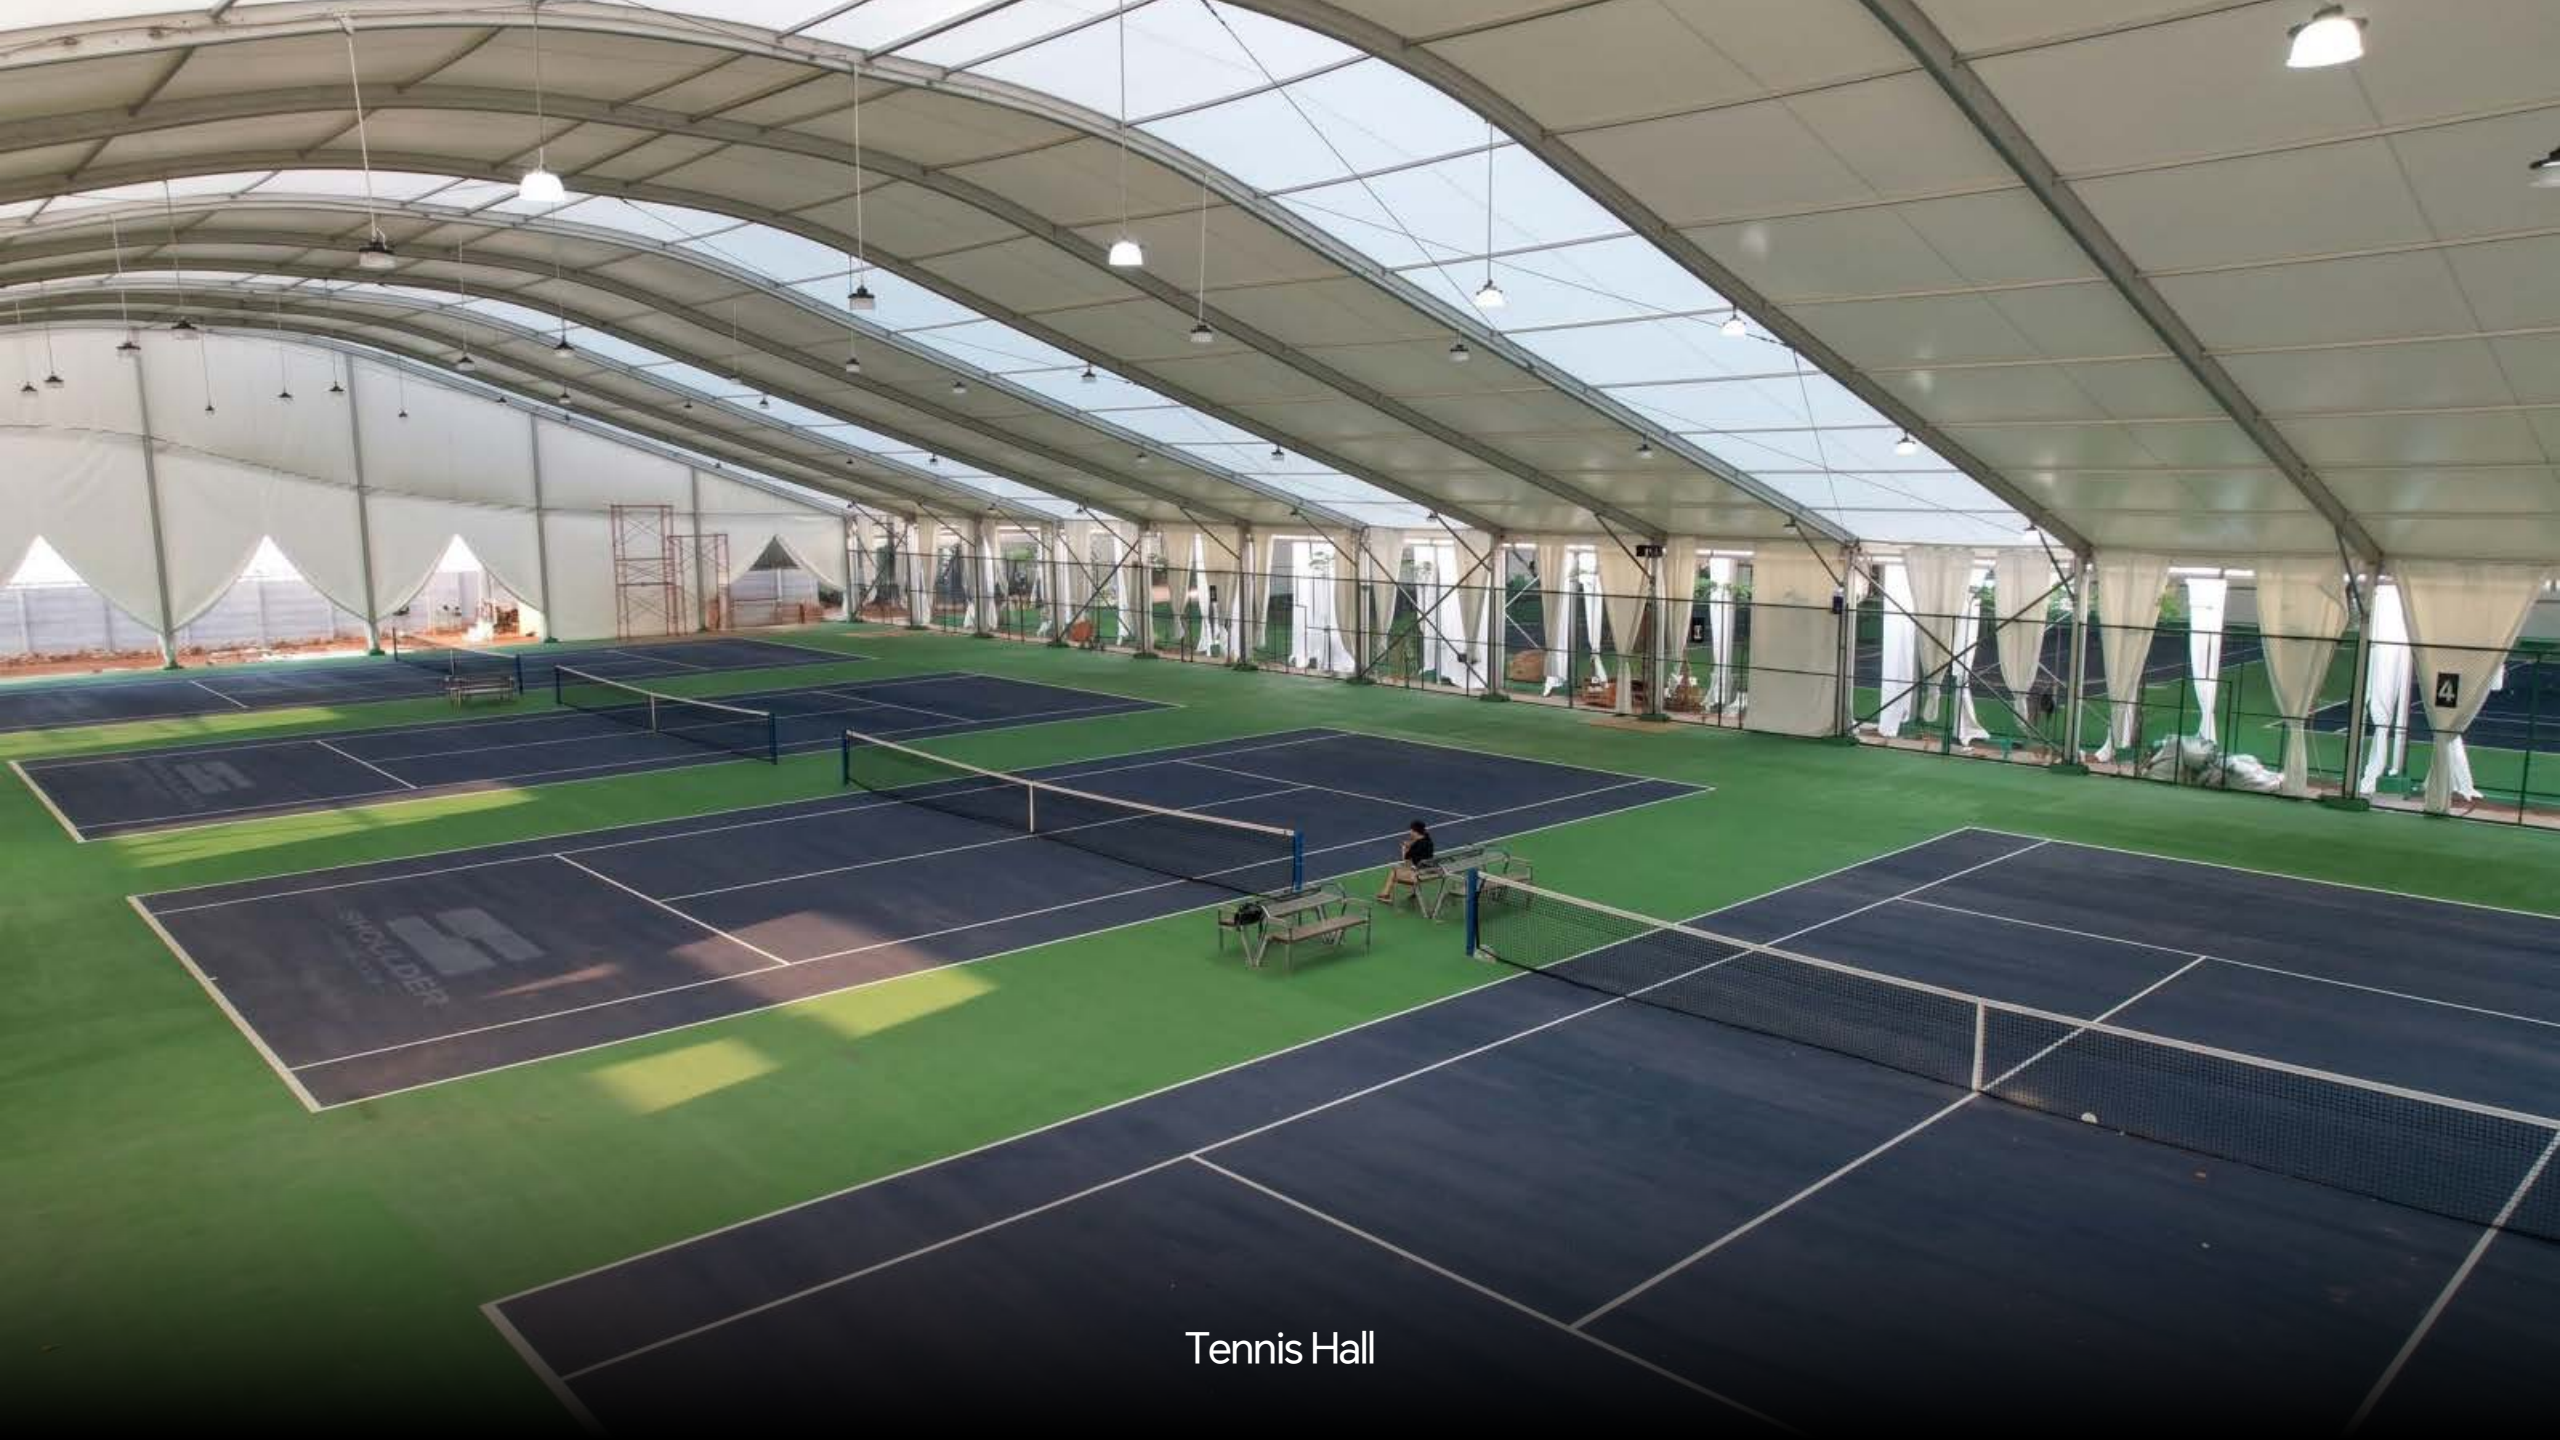

EDGE BEAM

Steel structural beam, strong foundation, stable and reliable

On-location Filming Site of the TV Drama

A SHOULDER project featured as an on-location filming site in CCTV's popular drama Deep in Wumeng. The project integrates harmoniously with its natural surroundings through a clear and complete spatial form, supporting the integrated development of agriculture, culture, and tourism. It helps local villagers increase income and move out of poverty, while showcasing the diverse value of hotel tents in cultural tourism, resort development, and

Service & Team

1. Project service process
2. Our Team

Project Process

Project Evaluation

1. Project SWOT Analysis Analysis
2. Project feasibility report
3. Project concept visualization
4. Project investment return evaluation
5. Assist in developing a comprehensive project timeline

1

Concept Design

1. Customer demands and ideas
2. Integrate all elements of the project location
3. Starting from user experience
4. Preliminary project plan and suggestions
5. Provide floor plans and style suggestions

2

Contract Established

1. Communication on business terms
2. Establish cooperation intention

3

Concept Design

Design Phase:

1. Hotel Positioning / Top-Down Image Strategy
2. Floor Plan
3. Comprehensive Rendering
4. Style Suggestions
5. Return on Investment Estimate

Design Phase:

1. Detailed Construction Drawings
2. Material Manual
3. Material Procurement Recommendations

On-site (remote)service phase:

1. Site inspection
2. On-site / Remote Service Phase
3. Commissioning guidance
4. Opening guidance and advice

4

Project Implementation

Production Phase:

1. Owned factory
2. Industrialized production of assembly components
3. Ensure rapid assembly and construction

Supporting Product Procurement Stage

1. Comprehensive Supply Chain
2. Cost-Effective Supporting Products
3. Designer-Preferred Customization
4. One-Stop Service

Construction Service Phase:

1. Project managers and skilled workers
2. Global guidance and construction services

5

Operations Consulting

Project Management Phase:

1. Management Systems, Talent Development, and Software Development

Project Marketing Phase:

1. Build a Marketing Platform
2. Plan Marketing Campaigns
3. Connect with Alliance Activities in Other Industries
4. Comprehensive Operations Services

6
