Teeth Whitening Kit

It's a collection of products designed to help whiten the shade of your teeth and remove stains, resulting in a brighter smile. These kits are commonly used for at-home teeth whitening and typically include teeth whitening gel and teeth whitening light.

How It works

The active whitening ingredients in the whitening gel release reactive oxygen through a chemical reaction, which breaks down the pigments on the surface of the teeth. Combined with the irradiation of blue or red light, an ideal whitening effect can be achieved.

Kind Reminder

Recommend daily use for a period of 1-2 weeks to achieve noticeable results. Results vary depending on the concentration of active whitening ingredients and the severity of teeth staining.

Benefits

- Convenient, can be used at home and travel
- More cost-effective compared to clinic whitening treatments
- Takes just 10-30 minutes each time

OEM Information

MOQ: 200 boxes

Range: 1. Print your design on the box & user manual
2. Print your logo on the syringe/pen & LED light
3. Customize the gel formula

Teeth Whitening Kit

Model #: GS-001X

Content:

1x 32 LED teeth whitening light
2x 3ml plastic pen
1x charging & sterilization case
1x charging cable
1x shade guide
1x user manual
1x gift box

Timer: 16 minutes

Power Source: 150mAh lithium ion battery.

Charging Time: 4 hours.

Battery Life: Up to 5 times on a full charge.

Disinfection Time: 3 minutes per cycle
(auto-starts when closed).

Advantages:

2pcs UV light, sterilization rate of 99.99%
Wireless charging case(400mAh lithium ion battery.)

EU patent: 015062946-0001

UK patent: 6370462

Teeth Whitening Strips

They are thin, flexible pieces of plastic coated with teeth whitening gel. They are designed to be applied directly to the teeth to help remove surface stains and brighten teeth color.

How It works

The active whitening ingredients in the whitening gel release reactive oxygen through a chemical reaction, which breaks down the pigments on the surface of the teeth.

Kind Reminder

Recommend daily use for a period of 1-2 weeks to achieve noticeable results. Results vary depending on the concentration of active whitening ingredients and the severity of teeth staining.

Benefits

- Easy to use at home and travel
- More affordable than clinic whitening treatments
- Takes just 30 minutes each application

OEM Information

MOQ: 500 boxes

Range: 1. Print your design on the sachet, shade guide, user manual and paper box
2. Customize the Strips formula
3. Customize the shape of teeth strips

Custom Fit for Every Smile

Teeth Whitening Strips

Model #: GS-004H/C/P/V

Content:

Purple Colour Corrector Series Products

Through colour correcting technology, it conceals the yellow tones in your teeth to improve and enhance the whiteness of your smile. All these products are peroxide-free, designed to work exactly like a concealer, but specifically for your teeth.

How does Purple work?

Purple is directly opposite yellow on the colour wheel and is therefore its complementary colour, so a water-soluble purple dye is applied to your teeth to cancel out any yellow undertones.

Benefits

- Reduces yellow tones
- Increases tooth brightness

OEM Information

MOQ: 200 boxes

Range: 1. Print logo on the product (except mouthwash sachet)

2. Print your design on the paper box

3. Customized formula

Electric Toothbrush

It's a toothbrush that uses electric power to move the brush head, providing either oscillating, rotating, or sonic (vibrating) motions to clean teeth more effectively than a manual toothbrush.

Benefits

- Superior Cleaning: Electric toothbrushes can remove more plaque and reduce gingivitis compared to manual brushing
- Ease of Use: They require less manual effort
- Built-in Timers: To ensure you brush for the recommended two minutes.
- Multiple Modes: Options like sensitive, whitening, and gum care cater to specific needs.

Who Should Use an Electric Toothbrush?

- Anyone looking for a more effective cleaning experience.
- People with braces, implants, or dental work.

OEM Information

MOQ: 200 boxes

Range: 1. Print your logo on the toothbrush handle
2. Print your design on the user manual & package box

Power Source: 800mAh lithium ion battery
Vibration: 33000-38000 times / min

Charging Mode&Time: 4 hours via USB-C cable;
 15 hours via wall charger.
Battery Life: Up to 30 days on a full charge.

EU Patent No.: 015075898-0001
Note: US and UK patents pending.

Dental Impression Material

They are used in dentistry to create a detailed and accurate negative replica (impression) of the teeth, gums, and surrounding oral structures. This replica is then used to produce a positive model (cast or die) of the patient's mouth, which is essential for various dental procedures.

Type of Dental Impression Material

Type 0 - Heavy Body

Type 3 - Light Body

Feature	Heavy Body	Light Body
Viscosity	Thick and viscous	Thin and fluid
Flow	Low flow, does not spread easily	High flow, spreads into fine details
Use	Captures gross anatomy	Captures fine details
Placement	Loaded into a tray	Injected around teeth
Rigidity	More rigid	More flexible

Combined Use

In many dental procedures, heavy body and light body materials are used together. The light body material captures the fine details, while the heavy body material provides a stable base. This combination ensures an accurate and durable impression.

OEM Information

MOQ: 200 boxes

Range: Print your design on the sticker label & package box
