COMPANY PROFILE

Bejan giant new packaging was founded in 2010. Baina focuses on providing cost-effective and high-quality printing and packing service for customers. Products include color box, gold and silver card box, luxury gift box, paper printing and other sets of packing services. Customers we served are widely distributed in many industries like food and beverage, cosmetics, health products, medicine, electronics and tobacco.

The company has continually improved the ability of R&D and manufacturing, and can also provide one-stop service of technological design based on customer's needs. Bejan covers an area of more than 10000 square meters and has advanced pre-press, printing and post-press equipment: high-quality printing machines such as Kodak CTP plate-making machine, German Koenig & Bauer 7+2-UV printing machine, Komori CMYK printing machine; automatic laminating machine, automatic hot foil stamping machine, automatic die cutting machine, automatic corrugated board laminator, automatic pasting machine, inspection machine and so on; equipment for fine production include image locating machine, corner pasting machine, molding machine, automatic case maker and other assembly line equipment for integration of fine production.

Bejan Giant New Packaging Science & Technology Co., Ltd ,takes "Hundred wills build Bejan, all strive for the best" as its service theory, customers' requirements as its orientation and customers' satisfaction as its service goal. The company continues to improve the level of fine management and the ability to guarantee the delivery time, quality and cost of customer orders, and promises to provide customers with efficient production delivery services. Bejan giant new packaging is always on its way to improve R & D and intelligent manufacturing level, so as to better understand customer requirements and realize the customer value of "packaging empowerment".

WELCOME

PACKING DETAILS

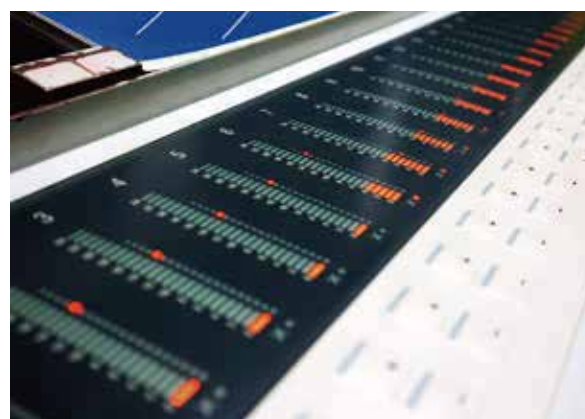

Mount Tai does not reject fine soil, so it can become its height; rivers do not choose small streams, so they can become deep.

Process defines result.

A minimal error or deviation may result in wide divergence.

The devil is in the details.

Responsibility is heavier than Mount Tai

WELL-TRAINED STAFF
