GROUP PROFILE

Guangzhou yongcheng cosmetics co., ltd., founded in 2018, is a technology-oriented enterprise specializing in the R&D, production and sales of aerosol products, mastering advanced BOV (bag-on-valve) dual-chamber aerosol technology.

Built in strict compliance with national safety and environmental standards, our production base is equipped with fully-automatic aerosol filling lines, BOV dual-chamber filling equipment and gmp workshops. We have a management team with rich professional experience in aerosol R&D and manufacturing. With over 150 employees, the base achieves an annual output of more than 100 million aerosol cans, serving as a key aerosol R&D and production hub in south china.

Cosmetic R&D and Efficacy Evaluation

Guangzhou Yongcheng Cosmetics boasts a complete R&D and laboratory system for safety testing, ingredient analysis, efficacy verification and product customization.

Our laboratories deliver toxicology tests, whitening-anti-wrinkle efficacy assessment, ingredient qualitative-quantitative analysis, prohibited-substance screening and trace heavy-metal detection. Skin-indicator tests validate product performance. Custom R&D for natural-plant skincare is available, supported by standardized quality control for compliant production.
