

PACKAGING FILMS

Company & product overview

Gojun Pack supplies POF shrink film, PE shrink film and EVOH multilayer barrier film for retail display, bundling and selected food-packaging applications. Based in Wenzhou, Zhejiang, China, the company supports specification matching and sample evaluation for different packaging processes.

POF

Retail display wrapping

POF-15-CF

For suitable daily goods, gift boxes and multipacks. Select film size, gauge and sealing conditions to match the package and machine.

PE

Bundling & protective wraps

PE-25-CF

For suitable beverage multipacks and protective bundling. Evaluate load retention, sharp edges and handling conditions on the finished pack.

EVOH

Multilayer barrier packaging

EVOH-45-CF-500

For oxygen-sensitive applications using a suitable full film structure. Match sealing, forming or vacuum requirements to the process.

A specification-led supply approach

Available options include film dimensions, roll or bag formats and selected printing requirements, subject to technical confirmation. Thermoforming films and vacuum bags are also part of the product portfolio.

POF family reference: GJ-POF-SERIES. This is a product-family management code; the order-specific grade and dimensions are confirmed in the quotation and approved specification.

Product photographs are for product presentation, not photographs of a specific customer project.

GOJUN PACK

Selection, validation and purchasing support

FROM REQUIREMENT TO SUPPLY

01 Define the pack

Share product dimensions, weight, packaging format, machine details, target market and storage conditions.

02 Confirm the specification

Agree material or layer structure, thickness, width, roll length or bag size, printing needs and trial quantity.

03 Validate samples

Check feeding, seal integrity, shrink appearance and handling performance under the intended operating conditions.

04 Confirm the order

Confirm MOQ, lead time, packing, shipment terms and acceptance criteria in the quotation or contract before production.

CUSTOMER CASE | UNITED STATES

Anonymous daily consumer goods manufacturer

Product: POF-15-CF **Initial order:** 6 metric tons **Use:** 8 months

Used for heat-shrink packaging of daily consumer goods gift boxes and multipacks. Usage duration is the project adoption period reported as of October 2026, not a shelf-life claim.

Agree the test method before comparing films

Suggested references: ASTM D882 for tensile properties and ASTM D2732 for unrestrained thermal shrinkage. Compare like-for-like specimens and stated conditions; acceptance limits are set by the approved specification. These references are not claims of product certification.

Food-contact suitability, barrier targets and shelf life require documentation and validation for the exact film, packed product and destination market.
