About Greenconn

Established in 1998, Greenconn is a leading provider of connector solutions, offering highly reliable interconnect products and customized solutions supported by vertically integrated supply chain capabilities. Our main product portfolio includes automotive, floating, high-speed, IDC, I/O, and other board-to-board and wire-to-board connectors, widely used in industrial, automotive, robotics, telecommunication, medical, and consumer electronics applications.

At Greenconn, quality is of the essence. From product design and development, tooling manufacturing, terminal stamping, surface plating, and injection molding, to automated assembly and packaging, we provide customers with one-stop manufacturing services. Greenconn operates under ISO 9001, IATF 16949, ISO 14001, and ISO 13485 management systems, with sustainability performance assessed by EcoVadis, ensuring consistent product quality and responsible operations.
