

JGD Centrifuge, located in Zhangjiagang, a national emerging port industrial city, has developed into a professional centrifuge manufacturer integrating technology research and development, project design, equipment manufacturing, product sales, and application services in the field of filtration and separation after decades of hard work.

Our company is committed to customer-centricity and focusing on improving the product application experience in niche markets. We primarily manufacture and develop various types of separation equipment, including:

- ★ **PLQ series fully automatic bag-discharge centrifuge**
- ★ **LGZ/PGZ series fully automatic scraper bottom-discharge centrifuge**
- ★ **PAUT series top-suspended automatic centrifuge**
- ★ **PS series top-discharge centrifuge**

- ★ PD series hanging bag-discharge centrifuge
- ★ PSLQ/PSFQ series full-flip top-discharge centrifuge
- ★ LWL series horizontal screw discharge filtration centrifuge
- ★ HY/HR series horizontal piston pusher centrifuge
- ★ GK/GKF series horizontal scraper discharge centrifuge
- ★ LW series horizontal decanter centrifuge
- ★ LLWZ Series Concentrating & Filtering Centrifuge

providing comprehensive filtration and separation solutions for the pharmaceutical, chemical, food, environmental protection, and metallurgical industries.

We provide in-depth customized services in areas such as **FDA, GMP, and CGMP certifications** for equipment, application of aseptic **CIP & SIP technologies**, on-site explosion-proof protection for products, concentration and pretreatment of materials, and automated and intelligent operation of equipment.
