

Shoe Washing Bags

COMPANY & PRODUCT BROCHURE | SEPTEMBER 2026

Zhejiang Runjiang New Material Technology Co., Ltd.

Established on 23 May 1995 in Wenzhou, Zhejiang, China, Runjiang manufactures textile bags and related products. OCTOPUS focuses on shoe washing bags for wholesale buyers, retail brands and e-commerce sellers.

Factory area	16,000 m ²
Team	80 employees; 8 development team members
Annual output	Approximately 1,000,000 units
Export business	Approximately 70%; markets include the USA, Turkey and Germany

Development and customization

The development team covers sampling, product structures and manufacturing processes. Projects can include size, material, color, logo, zipper and packaging customization. Requirements are confirmed against the selected design and order quantity.

Quality documentation

ISO 9001:2015 certificate 00924Q10121R1S covers production of nonwoven fabrics and industrial textile products, including storage boxes and cooler bags. It is a management-system certificate, not a shoe washing bag product certification.

A separate AZO report is available for a submitted yellow shoe washing bag shell sample. Test results apply to the tested sample and stated scope.

OCTOPUS The 2-Pack

PRODUCT FORMAT & CARE

Two separate shoe washing bags in one set. The range includes variant codes XYF-004-Y, XYF-004-YG and XYF-004-YW. These are variants within the same product family.

Dimensions	30 x 25 cm per bag
Weight	Approximately 200 g per bag; 400 g per two-bag set
Construction	Mesh exterior with chenille lining
Closure	Zipper with metal hook and anchor-loop locking clasp
Organization	Center pocket for removable insoles and shoelaces
Standard packaging	Two bags per set, with bubble-bag packaging

Choose for the footwear and washing machine

Check the actual shoe dimensions and care label before use. Each bag accommodates one compatible pair. Confirm that the footwear and washing machine both permit the intended washing method. Do not overfill the bag.

Use and care

Place compatible footwear inside the bag. Close the zipper and attach its locking clasp to the bag's anchor loop. The clasp secures the closure; it is not a device for fixing the bag to the washing machine.

Use cold water and follow the footwear care label and washing-machine instructions. Air dry after washing. Do not bleach or tumble dry. Inspect the bag, seams, zipper and clasp before reuse.

Wholesale & Custom Supply

ORDER PLANNING & CONTACT

Minimum quantities	Stock: 100 pieces Logo customization: 500 pieces Custom material: 6,000 pieces
Sample lead times	Standard sample: approximately 3 working days Custom sample: approximately 15 working days
