COMPANY PROFILE

Shandong Weierdun Protection Technology Co., Ltd. is a comprehensive enterprise that integrates the research and development, design, production, sales, and service of safety shoes. Its main products include multi-functional safety shoes such as anti smashing, anti stabbing, insulation, anti-static, anti slip, and welding shoes. The company has a production workshop of 10000m ^{2}, with an annual output of 5 million pairs of safety shoes, a modern intelligent warehouse of 20000m ^{2}, and a stock of 1 million pairs. It is equipped with advanced automated sorting equipment and an intelligent order and logistics system to ensure the efficient operation of the supply chain and meet the procurement needs of large-scale enterprises. We have our own standardized laboratory, introduce cutting-edge fully computerized quality testing equipment, establish strict quality control standards, and control the quality of safety shoes from the source to ensure a 100% product qualification rate. Since its development, Weierdun has been widely recognized both inside and outside the industry, and its products are exported to more than 100 countries and regions around the world, with many strategic long-term cooperative customers.

Smashing

Steel toe anti-smash labor insurance shoes are essential protective equipment for workers in high-risk environments, and their design not only focuses on safety, but also takes into account comfort and durability. Whether it is a construction site, manufacturing or logistics warehousing, these shoes can provide workers with a full range of foot protection to ensure work safety.

Flexural

Upper flex is a key factor in the design of labor protection shoes, affecting comfort and protection. Through rational material selection, structural design and testing, flexibility and comfort can be provided while ensuring protection to meet the needs of workers in diverse work environments.

Abrasion

Abrasion resistance of shoe soles is a key indicator of durability and performance, and is especially critical for labor protection shoes. Workers work in complex and harsh environments, and soles need to have excellent abrasion resistance to ensure longevity and safety.

Antistatic

Anti-static is the necessary protective equipment in the static sensitive environment, through the reasonable selection of materials and design, effectively prevent the accumulation of static electricity, to protect work safety and product quality. Choosing standardized, comfortable and durable anti-static shoes can significantly improve work efficiency and safety.

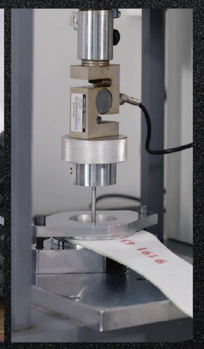

Anti-stab

Anti-puncture is the necessary protective equipment in the environment of sharp objects, through the reasonable selection of materials and design, effectively preventing puncture and guaranteeing the safety of the soles of the feet. Choosing standardized, comfortable and durable anti-puncture shoes can significantly improve work efficiency and safety.
