About Lewistone

Lewistone, founded in 2008, is a leading manufacturer of quartz surfaces in China. Covering over 100,000 square meters in Foshan, the company operates 3 advanced production lines with a monthly output exceeding 100 containers of quartz slabs.

At Lewistone, we believe that stone is not just a material—it's a medium through which nature speaks, and design takes shape. Rooted in a spirit of quiet innovation, we craft engineered surfaces that embody the poetry of earth, light, and time.

Our collections include the refined Quartz Series, known for its timeless mineral elegance, and the expressive Printed Art Series, where modern technology meets artistic imagination. Every slab we create is full-body, translucent, and brought to life through our proprietary research and development, as well as advanced production techniques—ensuring both visual depth and structural integrity.

From kitchens to commercial spaces, Lewistone materials are designed not only to endure but to inspire.
