Product Categories

– PP woven fabric rolls (±0.5g/m² tolerance control)

Material : Polypropylene (color can be customized)

Features and Application : Woven bags, durable, low-cost are widely used to Pack:

- **Agricultural products**: grains (rice, wheat, corn), miscellaneous grains (red beans, mung beans), and vegetables (potatoes, sweet potatoes).

- **Industrial materials**: construction materials (sand, cement, stones), chemical raw materials (plastic particles, fertilizers) (when meeting safety standards).

- **Others**: daily items (clothes, quilts) for moving, and solid waste for recycling.

– PE woven fabric rolls (±0.5g/m² tolerance control)

Material : Polyethylene (color: white or transparent)

Features and Application : Polyethylene (PE) woven bags have sun protection as a key advantage. Their material has certain UV resistance, so they are less likely to age, become brittle or crack quickly under prolonged sun exposure, maintaining structural stability and load-bearing capacity.

Typical uses based on this include outdoor storage (e.g., construction materials, farm grains), agricultural outdoor scenarios (covering crops, temporary sunshade), and outdoor project assistance (covering tools/materials).

Other features: chemical resistance, low cost, recyclability.

- PP woven bags & PE woven bags

Material : Polypropylene or Polyethylene (Dimensions, colors and thickness can all be customized according to your requirements.)

Features and Application : They have been made into bags and can be directly used for product packaging.

— Durable and strong, with good load-bearing capacity.

—— Cost-effective and economical.

—— Breathable to some extent.

—— Moisture-resistant (especially laminated bags).

—— UV-resistant (PE types perform well).

—— Easy to handle and transport.

- BOPP film bag

Material : PP(PE),Bopp film (Dimensions, colors and thickness can all be customized according to your requirements.)

Features and Application : Color-printed woven bags can be used to package high-end rice, fertilizers, feeds, chemical products, etc.

——Boost brand recognition with logos, patterns, etc., acting as mobile ads.

——Elevate product grade with better aesthetics, reducing a "cheap" feel.

——Moisture-proof, combining practicality and beauty.

- Paper/PP valve bags ·

Material : Paper,PP(PE),Bopp film (Dimensions, colors and thickness can all be customized according to your requirements.)

Features and Application : Valve bags are an industrial bag type widely used for packaging powdery and granular materials. Their unique structure and design make them highly favored in various industries, such as building materials, chemicals, food, and feed.

——Efficient Filling and Leak-proof Sealing

Valve Design: With a filling valve at the top, it can be quickly filled through automated equipment, greatly improving packaging efficiency.

——Compatibility with Automation and Labor-saving

——Stable Stacking and Space–saving

——High Space Utilization

——Durable, and Adaptable
