ZOOLIED

Company

Zoolied Inc. is a leading designer and manufacturer of high-quality precision optical components, laser accessories and measuring equipments for a wide range of laser, medical, transportation, biometrics, aerospace and other fields solutions. At Zoolied Inc., our research and development team constantly strive to develop pioneering technologies and deliver innovative products for the tactical market. Zoolied Inc. was established in 2015,over the past years, Zoolied Brand products not only have been tested and put into trial operation and delivered for use in various divisions of the domestic market, but also exported to North America, Southeast Asia and Europe. The presence of positive reviews and the absence of complaints on their part confirms the high quality of Zoolied.

Production workers number:39

Technical engineers number: 6

Logistics sales and other stall number:14

Lens

Optical Lenses are optical components designed to focus or diverge light. Optical Lenses, which may consist of a single or multiple elements, are used in a wide variety of applications from microscopy to laser processing. Many industries utilize Optical Lenses, including life sciences, imaging, industrial, or defense. As light passes through a lens, it is affected by the lens' profile or substrate.

OPTICAL FIBER LASER PROTECTIVE GLASS

—

Zoolied provides a variety of laser windows, which can meet a variety of laser transmission, laser reflection and laser blocking requirements, and can effectively reflect unnecessary wavelengths while transmitting the required wavelengths.

Si wafers

Silicon wafer is the basic material for making semiconductor chips,Silicon is the second most common element in the earth's crust, accounting for about 26%, second only to oxygen (49%). Silicon is widely present in high-concentration sand, gravel and rocks in the form of quartz (silica) in nature. Then through a series of complex processes such as purification and processing, it becomes the basic raw material-silicon wafer that meets the requirements of producing integrated circuits.

Filters

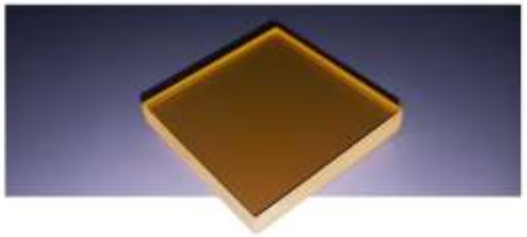

- Interference Filter
- Band Pass Filter
- Long Pass Filter
- Short Pass Filter
- Dichroic Filter
- IR Filter
- UV Filter
- Neutral Density Filter
- Muti-channel Filter
- Beam Splitter Filter
- Color Glass Filter
- Notch Filter

IR OPTICS (NIR, MIR, LWIR)

Zoolied Inc. offers different infrared optics,
material include ZnS, ZnSe, Silicon, Germanium, LiF, MgF2, BaF2, CaF2...
shapes include aspherical, spherical, cylindrical and flat;
coatings include AR, BBAR, DLC wavelength for MIR, FIR, UV, NIR and Visible.
